DEPARTMENT OF LABOR
Lillian Roberts, Commissioner

NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS - Angelo J. Massa, Acting Director

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
August 1983

Civilian Labor Force

The number of New York State residents with jobs in August 1983 was 7,728,000, a gain of 52,000 from a month ago and an increase of 244,000 from a year ago. The current figure surpassed the all-time record-high level of resident employment established in July.

Joblessness in the state declined 37,000 between July and August 1983 to 695,000, but was 9,000 above the employment level recorded in August 1982.

The decline in unemployment, coupled with the rise in resident jobholders, caused the state's rate of unemployment to drop 0.5 of a percentage point from July 1983 to 8.2 percent in August 1983. The unemployment rate was below that of a year ago (8.4 percent) for the first time since April 1982.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households), which normally shows a moderate increase in August, fell 40,600 from July 1983 to 7,160,500.

The nonfarm downturn was centered primarily in the nonmanufacturing sector (-54,300) where the job level was severely depressed because of a massive industrial controversy in the telephone communications segment of the transportation and public utilities division (-47,200). A significant job loss also occurred in the public sector (-10,200) with most of the decrease caused by school districts and community colleges furloughing nonteaching personnel following the close of the summer semester. Trade payrolls (-1,800) were down moderately, mainly because of staff cutbacks among retail department stores.

Job increases in construction (+2,600); services (+1,300); and finance, insurance, and real estate (+1,000) softened these losses. Seasonal influences prompted the higher job levels in construction, with nearly three-quarters of the upturn in the special trade contractors segment. The rise in services employment was in large part due to the recall of workers and the return to work by strikers in the health services industry, plus staff expansion in the hotel, motel, and trailer camp industry. Increased business activity in the banking and brokerage industries accounted for the payroll gain in the finance, insurance, and real estate group.

The number of jobs in manufacturing rose 13,600 between July and August 1983, with more than eight out of 10 job additions in the nondurable goods segment (+11,600). However, the soft goods employment gain was considerably less than usual for this time of year. Since fewer persons took unpaid vacation in July than usual, fewer persons were returning to jobs in August. Nearly all soft goods industries shared in the payroll hike, with the largest gains reported by the apparel (+3,500), food (+1,700), and miscellaneous manufacturing (+1,600) industries. Hiring in the women's outerwear component accounted for over 40 percent of the apparel upturn, while the job gain in food was dominated by the canning segment. Among the industry components, which shared in the miscellaneous manufacturing staff buildup, the largest gain occurred in the jewelry and silverware industry.

Increased demand for durable goods products, coupled with the absence of the usual August automotive equipment plant shutdowns for new model retooling, led to a moderate gain of 2,200 in hard goods employment. The fabricated metals (+700) and electrical machinery (+600) industries reported the largest number of job additions. The fabricated metals job pickup was shared by nearly all industry components, while the rise in electrical machinery was largely concentrated in the electric transmission and miscellaneous electrical machinery, and electronic component industries.

Small employment losses in the transportation equipment (-600) and nonelectrical machinery (-200) industries tempered the hard goods job expansion. Most of the decline in transportation equipment payrolls occurred in the aircraft portion of the industry.

The state's nonfarm payroll count in August 1983 was down 81,900 from the level recorded 12 months ago. Job cutbacks in the factory sector accounted for 48,000 or nearly 60 percent of the deficit. Heavy strike activity in the nonmanufacturing sector was responsible for most of the remaining job losses in nonfarm employment.

INSURED EMPLOYMENT AND PAYROLLS
FOURTH QUARTER 1982

INSURED EMPLOYMENT AND PAYROLLS
FOURTH QUARTER 1982

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January 1960, an employer of individuals other than household workers becomes liable for the unemployment insurance tax if within a single calendar quarter he pays remuneration of $300 or more. As a result of an amendment effective January 1966, an employer who employs one or more household workers and pays them cash remuneration of $500 of more within a single calendar quarter becomes liable for the tax. In effect, employers of one or more workers become liable for the unemployment insurance tax on the first day of the calendar quarter in which remuneration is paid.

Most persons employed by nonprofit organization were covered by unemployment insurance beginning January 1, 1971 as a result of "stand-by" legislation originally enacted in 1965 which became operative because of the federal amendments of 1970.

A nonprofit organization becomes liable when it makes cash payments to its employees of $1,000 or more in a calendar quarter. Effective January 1, 1972, liability also begins if the nonprofit organization employs four or more persons on each of 20 days in at least 20 different weeks during the current or preceding calendar year.

Prior to January 1, 1978, the services of persons engaged in a teaching or other professional capacity at a nonprofit educational institution below the college level were excluded from covered employment. Beginning January 1, 1978, the services of these employees are covered by unemployment insurance.

Agricultural labor is also newly covered as of January 1, 1978. Exceptions exist for employers of fewer than 10 persons or those with a quarterly payroll of less than $20,000.

Certain groups continue to be excluded from coverage. Those excluded are interstate railroads, self-employed, services of an individual employer's wife, husband or minor child and certain other small groups of workers.

Data for employees of the federal government, New York State, and local government units covered for unemployment compensation purposes are excluded from this series. Employment and payrolls of persons in private industry only are reported in this series.

Insured employment data are not intended to reflect a continuous series over the years. The data only represent experience within a specific calendar period. Significant factors which affect comparability are changes in the coverage provisions of the law, such as those mentioned above, as well as employment reclassification changes. The reclassification changes are occasioned by industrial and/or geographic classification code changes. They may be economic or noneconomic. Economic code changes are made in the quarter when the product or business activity of an establishment has changes (industry code) or whenever an employer moves from one location to another in New York State (geographic code). Noneconomic code changes are made effective in the first quarter of each year. Noneconomic code changes arise from (1) structural changes in the *Standard Industrial Classification Manual*, and (2) newly disclosed information affecting either the industrial or geographic location.

REPORTING UNIT. An establishment, or reporting unit, is usually a single place of business, engaged in a single business activity, and operated by a single employer. Business firms operating more than one establishment, in different counties, or different activities in one or more counties, usually submit a separate report for each unit unless the payrolls are not maintained separately. However, if an employer operates two or more establishments in a single county that are engaged in the same business activity, the establishments usually are reported together as a single unit. If two or more units of a single employer are in a single physical location but maintain separate payroll records and engage in distinct or separate business activities, then each unit is treated as a separate reporting unit.

EMPLOYMENT. The tables in this report include all private employment covered under the New York State Unemployment Insurance Law for each of the three months in the quarter. The employment count represents the number of full-time and part-time employees earning wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily earning no wages because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during the same reference week are reported more than once.

TOTAL QUARTERLY PAYROLLS. Total quarterly payrolls cover *all wages and salaries* paid to individuals in insured employment.

INDUSTRIAL CLASSIFICATION. Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification Manual* prepared by the U.S. Office of Management and Budget. This edition replaces the 1967 edition. Structural changes as a result of revisions in the *Manual* are incorporated in data beginning with the first quarter of 1975.

When a 2-digit manufacturing industry has less than 100 employees or less than four reporting units, figures are combined in "all other durable goods" or "all other nondurable goods."

The category "all other" includes agriculture, forestry and fisheries, mining and unclassified establishments.

COUNTY CLASSIFICATION. County classification of employment and payroll data is based on the physical location of the establishment. The category "statewide" which appears at the end of the county listing covers all reporting units not classified by county. Included in this category are: reporting units without a fixed location within the State, those with a significant number of employees in more than one county for which separate data are not available, and those for which county location has not yet been determined.

LABOR AREA. A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purpose of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and employment service program) is given below.

--**Albany-Schenectady-Troy.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
-- *Binghamton.* Broome and Tioga counties.
--**Buffalo.* Erie and Niagara counties.
--**Nassau-Suffolk.* Nassau and Suffolk counties.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties.
--**Rochester.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
--**Syracuse* Madison, Onondaga and Oswego counties.
--**Utica-Rome.* Herkimer and Oneida counties.
-- *Westchester.* Westchester County.

*Geographical boundaries of labor area are identical with boundaries of the Statdard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget (OMB).

SOURCE OF DATA. Reports submitted quarterly by employers subject to the New York State Unemployment Insurance Law.

Table 1. REPORTING UNITS, EMPLOYMENT AND PAYROLLS COVERED BY UNEMPLOYMENT INSURANCE, NEW YORK STATE, BY INDUSTRY OCTOBER-DECEMBER 1982

INSURED EMPLOYMENT IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE
FOURTH QUARTER 1982

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1982 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--Hours, Average Weekly Overtime. Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.
[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or -	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Compiled on a fiscal year basis for the state, selected major labor areas, New York City, and the Suburban District (Westchester, Rockland, and Putnam counties).
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

13. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers,* and *Medical Office Assistant.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

14. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative action plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

15. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

16. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State.* The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00.

17. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females; blacks; American Indians, Eskimos, and Aleuts; Asians and Pacific Islanders; and persons of Hispanic origin. Percent distributions are also shown. March 1983.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

B-PUBLICATIONS--Continued

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209), published in 1976.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

LABOR RESEARCH REPORTS--Continued

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** The report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Administration.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

82-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Years 1976-77 through 1979-80.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in one or more of the three benefit years from 1977-78 through 1979-80. The report is a successor to the reports on claimant characteristics previously issued annually.

83-2. **Prolonging Working Life.** This report presents the findings of a survey designed to identify private-sector programs and practices that enhance employment opportunities or help to prolong the working lives of older workers -- defined in this survey as those 55 years of age or older. The report describes variations from traditional work schedules, such as flexible working hours, compressed workweeks, part-time and/or temporary employment. Experiences of responding firms with various programs are presented in the report.

MONTH IN REVIEW
September 1983

Civilian Labor Force

Resident employment in New York State fell sharply between August and September 1983, dropping 255,000 to 7,473,000. Since September 1982, the number of resident jobholders has risen 231,000.

Joblessness in the state declined 22,000 from August 1983 to 673,000 in September 1983. Over the past 12 months, the number of jobseekers has increased 6,000.

The downturn in resident employment more than offset the decline in unemployment, causing the state's unemployment rate to move upwards 0.1 of a percentage point over the month to 8.3 percent in September 1983. However, the jobless rate was 0.1 of a percentage point lower than a year ago.

Nonfarm Employment

The nonagricultural wage and salary job count (which excludes agricultural workers, the self-employed, unpaid family workers, and domestic workers in private households) rose 51,000 from August 1983 to 7,212,600 in September 1983--there is usually an over-the-month job decline at this time of year. The nonfarm job upturn reflected the return to work of striking communications and electrical utility workers in the transportation and public utilities division. Discounting these labor-management settlements, the state's nonfarm payroll tally would have shown a moderate decline when compared with former August-September job losses.

Nonmanufacturing employers reported job additions totaling 41,900 in September 1983 as payroll gains in the transportation and public utilities (+70,100) and trade (+6,900) groups more than offset seasonal employment losses among the other industry divisions. The end of strikes by telephone communications and electrical utility workers, coupled with the return to work by school bus drivers, accounted for the upsurge in transportation and public utilities payrolls. Seasonal staff buildup in retail department stores and restaurants provided nearly 60 percent of the job expansion in trade. Among the nonmanufacturing divisions posting lower job levels than a month ago, the largest losses were registered by the public sector (-23,200) and services (-7,400). The termination of jobs in summer youth programs outweighed gains in local and state education and accounted for the drop in government payrolls. Payroll cuts in the hotel, motel, and trailer camp, and amusement and recreational services industries led the reduction in services employment. Less notable seasonal job decreases occurred in the finance, insurance, and real estate (-3,200) and construction (-1,200) groups. The bulk of the loss in finance, insurance, and real estate jobs was in the real estate and banking categories of the division.

Manufacturing payrolls rose 9,100 in September 1983, with seasonal hiring in both durable and nondurable components. There were 4,900 more soft goods jobs in September than in August, with over half of the increase in the apparel industry (+2,700). Nearly all components of the apparel industry shared in the upturn with the women's outerwear category showing the largest number of job additions. Among the remaining soft goods industries, the food (+1,200) and miscellaneous manufacturing industries (+800) posted notable payroll gains. Employment advances in the canning industry accounted for the rise in food jobs, while the largest increase in miscellaneous manufacturing jobs occurred in the jewelry, silverware, and plated ware industry.

Durable goods employers added 4,100 jobs to their payrolls in September, with the transportation equipment industry (+1,700) providing approximately 40 percent of the expansion. Hires resulting from new production schedules for 1984 automobiles in the motor vehicle and motor vehicle equipment industry highlighted the gain in transportation equipment. Smaller job gains were reported by the majority of the remaining hard goods industries. Increased product demand in the electrical machinery (+1,000) and stone, clay, glass, and concrete (+600) industries prompted large job gains.

Since September 1982, nonfarm employment in the state has lost a total of 12,000 jobs, mainly because of reductions in manufacturing jobs.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1982 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

---

[1] Subarea of New York City area.
[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or –	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Compiled on a fiscal year basis for the state, selected major labor areas, New York City, and the Suburban District (Westchester, Rockland, and Putnam counties).
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

13. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers,* and *Medical Office Assistant.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

14. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative action plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

15. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

16. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State.* The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00.

17. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females; blacks; American Indians, Eskimos, and Aleuts; Asians and Pacific Islanders; and persons of Hispanic origin. Percent distributions are also shown. March 1983.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

B-PUBLICATIONS--Continued

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209), published in 1976.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

LABOR RESEARCH REPORTS--Continued

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** The report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Administration.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

82-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Years 1976-77 through 1979-80.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in one or more of the three benefit years from 1977-78 through 1979-80. The report is a successor to the reports on claimant characteristics previously issued annually.

83-2. **Prolonging Working Life.** This report presents the findings of a survey designed to identify private-sector programs and practices that enhance employment opportunities or help to prolong the working lives of older workers -- defined in this survey as those 55 years of age or older. The report describes variations from traditional work schedules, such as flexible working hours, compressed workweeks, part-time and/or temporary employment. Experiences of responding firms with various programs are presented in the report.

MONTH IN REVIEW
October 1983

Civilian Labor Force

The number of employed New York State residents fell 40,000 from September 1983 to 7,433,000 in October 1983. However, compared with a year ago, the current figure was higher by 195,000.

Total unemployment in the state declined sharply between September and October 1983, dropping 58,000 to 615,000. Since October 1982, the number of persons seeking work has decreased by 102,000.

The reduction in joblessness caused the state's rate of unemployment to move downwards 0.7 of a percentage point from September 1983 to 7.6 percent in October 1983, or 1.4 percentage points below the rate recorded a year ago.

Nonfarm Employment

The state's nonagricultural wage and salary job count (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) surged upwards by 56,400 from September 1983 to 7,269,000 in October 1983. Seasonal hiring by nonmanufacturing employers, augmented by an unexpected job upturn in the factory sector, produced an over-the-month gain that was 19,100 higher than the average September-October nonfarm increase over the past two years.

The manufacturing sector's payroll count received an unexpected boost of 3,400 job additions in October (compared to an average reduction of 14,800 in the past two years) as sudden product demand prompted higher job levels, particularly in the nondurable goods segment (+3,500). This was a reversal of the usual pattern--decreases in soft goods employment usually occur at this time of year. The majority of soft goods industries experienced larger payrosters in October with the apparel industry (+2,500) accounting for the largest portion of the upturn. Over two-thirds of the apparel expansion occurred in the women's outerwear category. Other notable employment advances were reported by the textile (+500), miscellaneous manufacturing (+500), and paper (+400) industries.

Durable goods employment in October was essentially unchanged (-100) from a month ago as seasonal cutbacks among four of the nine hard goods industries barely outweighed job additions reported by the remaining five hard goods components. The largest hard goods decreases occurred in the instruments, photo and optical goods industry (-900), down in the surgical, medical and dental instruments portion; and the primary metals industry (-700), down in the blast furnace category. The largest hard goods job advances were posted by the electrical machinery (+800) and transportation equipment (+700) industries. Hiring to accommodate increased product demand in nearly all components was the reason for the gain in electrical machinery jobs. A strike in the electric lighting and wiring segment tempered this increase. The rise in transportation equipment jobs was highlighted by staff additions in the motor vehicle and motor vehicle equipment industry, which was in the midst of 1984 production.

Nonmanufacturing payrolls grew by 53,000 in October 1983 as seasonal job additions in the public sector (+38,100), services (+12,300), and trade (+5,700) far outstripped seasonal job losses in finance, insurance, and real estate (-2,500) and transportation and public utilities (-900). Continued staff buildup among local school systems and private education institutions dominated the job advances in government and services, respectively. The largest share of the expansion in trade employment occurred in the retail portion, notably department stores, miscellaneous retail stores, and apparel stores. In the finance, insurance, and real estate division, job cutbacks in the real estate industry accounted for nearly all of the downturn, while the loss in transportation and public utilities jobs was concentrated mainly in the water and air transportation industries. Both the mining and construction industries' job levels were unchanged from a month ago.

Compared with a year ago, the state's October 1983 nonfarm job tally was higher by 9,800--the first favorable year-to-year comparison of nonagricultural employment in 19 months. ■

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for September 1983 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
384	Medical & dental instruments and supplies	$294.48	40.9	$7.20
204	Grain mill products	504.67	47.7	10.58
231	Men's & boys' suits, coats & overcoats	267.18	36.6	7.30

[3] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

Table A-4. AVERAGE WEEKLY HOURS AND AVERAGE OVERTIME HOURS OF PRODUCTION WORKERS IN SELECTED MANUFACTURING INDUSTRIES, NEW YORK STATE

(See page i for explanation of data)

INSURED EMPLOYMENT AND PAYROLLS
FIRST QUARTER 1983

INSURED EMPLOYMENT AND PAYROLLS
FIRST QUARTER 1983

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January 1960, an employer of individuals other than household workers becomes liable for the unemployment insurance tax if within a single calendar quarter he pays remuneration of $300 or more. As a result of an amendment effective January 1966, an employer who employs one or more household workers and pays them cash remuneration of $500 of more within a single calendar quarter becomes liable for the tax. In effect, employers of one or more workers become liable for the unemployment insurance tax on the first day of the calendar quarter in which remuneration is paid.

Most persons employed by nonprofit organization were covered by unemployment insurance beginning January 1, 1971 as a result of "stand-by" legislation originally enacted in 1965 which became operative because of the federal amendments of 1970.

A nonprofit organization becomes liable when it makes cash payments to its employees of $1,000 or more in a calendar quarter. Effective January 1, 1972, liability also begins if the nonprofit organization employs four or more persons on each of 20 days in at least 20 different weeks during the current or preceding calendar year.

Prior to January 1, 1978, the services of persons engaged in a teaching or other professional capacity at a nonprofit educational institution below the college level were excluded from covered employment. Beginning January 1, 1978, the services of these employees are covered by unemployment insurance.

Agricultural labor is also newly covered as of January 1, 1978. Exceptions exist for employers of fewer than 10 persons or those with a quarterly payroll of less than $20,000.

Certain groups continue to be excluded from coverage. Those excluded are interstate railroads, self-employed, services of an individual employer's wife, husband or minor child and certain other small groups of workers.

Data for employees of the federal government, New York State, and local government units covered for unemployment compensation purposes are excluded from this series. Employment and payrolls of persons in private industry only are reported in this series.

Insured employment data are not intended to reflect a continuous series over the years. The data only represent experience within a specific calendar period. Significant factors which affect comparability are changes in the coverage provisions of the law, such as those mentioned above, as well as employment reclassification changes. The reclassification changes are occasioned by industrial and/or geographic classification code changes. They may be economic or noneconomic. Economic code changes are made in the quarter when the product or business activity of an establishment has changes (industry code) or whenever an employer moves from one location to another in New York State (geographic code). Noneconomic code changes are made effective in the first quarter of each year. Noneconomic code changes arise from (1) structural changes in the *Standard Industrial Classification Manual*, and (2) newly disclosed information affecting either the industrial or geographic location.

REPORTING UNIT. An establishment, or reporting unit, is usually a single place of business, engaged in a single business activity, and operated by a single employer. Business firms operating more than one establishment, in different counties, or different activities in one or more counties, usually submit a separate report for each unit unless the payrolls are not maintained separately. However, if an employer operates two or more establishments in a single county that are engaged in the same business activity, the establishments usually are reported together as a single unit. If two or more units of a single employer are in a single physical location but maintain separate payroll records and engage in distinct or separate business activities, then each unit is treated as a separate reporting unit.

EMPLOYMENT. The tables in this report include all private employment covered under the New York State Unemployment Insurance Law for each of the three months in the quarter. The employment count represents the number of full-time and part-time employees earning wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily earning no wages because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during the same reference week are reported more than once.

TOTAL QUARTERLY PAYROLLS. Total quarterly payrolls cover *all wages and salaries* paid to individuals in insured employment.

INDUSTRIAL CLASSIFICATION. Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification Manual* prepared by the U.S. Office of Management and Budget. This edition replaces the 1967 edition. Structural changes as a result of revisions in the *Manual* are incorporated in data beginning with the first quarter of 1975.

When a 2-digit manufacturing industry has less than 100 employees or less than four reporting units, figures are combined in "all other durable goods" or "all other nondurable goods."

The category "all other" includes agriculture, forestry and fisheries, mining and unclassified establishments.

COUNTY CLASSIFICATION. County classification of employment and payroll data is based on the physical location of the establishment. The category "statewide" which appears at the end of the county listing covers all reporting units not classified by county. Included in this category are: reporting units without a fixed location within the State, those with a significant number of employees in more than one county for which separate data are not available, and those for which county location has not yet been determined.

LABOR AREA. A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purpose of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and employment service program) is given below.

--**Albany-Schenectady-Troy*. Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
-- *Binghamton*. Broome and Tioga counties.
--**Buffalo*. Erie and Niagara counties.
--**Nassau-Suffolk*. Nassau and Suffolk counties.
-- *New York City*. Bronx, Kings, New York, Queens and Richmond counties.
--**Rochester*. Livingston, Monroe, Ontario, Orleans and Wayne counties.
--**Syracuse* Madison, Onondaga and Oswego counties.
--**Utica-Rome*. Herkimer and Oneida counties.
-- *Westchester*. Westchester County.

*Geographical boundaries of labor area are identical with boundaries of the Statdard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget (OMB).

SOURCE OF DATA. Reports submitted quarterly by employers subject to the New York State Unemployment Insurance Law.

Table 1. REPORTING UNITS, EMPLOYMENT AND PAYROLLS COVERED BY UNEMPLOYMENT INSURANCE, NEW YORK STATE, BY INDUSTRY JANUARY-MARCH 1983

INSURED EMPLOYMENT IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE
FIRST QUARTER 1983

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1982 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--Hours, Average Weekly Overtime Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.
[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles.* SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or –	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Compiled on a fiscal year basis for the state, selected major labor areas, New York City, and the Suburban District (Westchester, Rockland, and Putnam counties).
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1977.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual**. The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

13. **Occupational Brief.** To date, 6 different titles have been prepared: *Air-Traffic Controller, Bank Teller, Dental Hygienist, Flight Attendant, Insulation Workers,* and *Medical Office Assistant*. The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. August 1980.

14. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative action plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

15. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

16. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State*. The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00.

17. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females; blacks, American Indians, Eskimos, and Aleuts; Asians and Pacific Islanders; and persons of Hispanic origin. Percent distributions are also shown. March 1983.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

B-PUBLICATIONS--Continued

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209), published in 1976.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

LABOR RESEARCH REPORTS--Continued

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** The report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Administration.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

82-5. **Unemployment Insurance Beneficiaries in New York State, Benefit Years 1976-77 through 1979-80.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in one or more of the three benefit years from 1977-78 through 1979-80. The report is a successor to the reports on claimant characteristics previously issued annually.

83-2. **Prolonging Working Life.** This report presents the findings of a survey designed to identify private-sector programs and practices that enhance employment opportunities or help to prolong the working lives of older workers -- defined in this survey as those 55 years of age or older. The report describes variations from traditional work schedules, such as flexible working hours, compressed workweeks, part-time and/or temporary employment. Experiences of responding firms with various programs are presented in the report.

November 1983

Civilian Labor Force

The number of employed New York State residents in November 1983 was 7,433,000, the same figure as in October 1983. Compared with a year ago, the current resident jobholder level was higher by 273,000.

Total unemployment in the state dipped 31,000 between October and November 1983 to 584,000, or 170,000 below the jobless count recorded in November 1982.

The reduction in joblessness caused the state's rate of unemployment to drop 0.3 of a percentage point from October 1983 to 7.3 percent in November 1983, the lowest rate of unemployment for the state in 24 months. Since November 1982, the jobless rate has fallen 2.2 percentage points.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) increased 38,500 from October 1983 to 7,309,500 in November 1983. This job gain far exceeded the average October-November advance of 20,900 over the past five years, reflecting greater-than-normal hiring in trade in response to record sales, and continued demand for factory products, especially durable goods.

The nonmanufacturing job count rose 37,300 between October and November 1983, primarily because of job additions in trade (+29,600) and government (+11,500). Retailers, particularly department stores, hired more temporary staff than usual in expectation of one of the best holiday sales seasons in recent years. Almost all of the upturn in public payrolls could be traced to seasonal job gains in local education. The services (+1,600) and finance, insurance, and real estate (+200) divisions posted lesser job advances. The largest increase in services jobs occurred in the private education segment, while the brokerage industry accounted for most of the gain in finance, insurance, and real estate employment. The approach of colder weather prompted the 3,400 downturn in construction payrolls. At the same time, seasonal cutbacks in the air transportation industry, coupled with a strike against a major bus line, caused transportation and public utilities jobs to decline 1,900.

Manufacturing employment, which has shown October-November job losses in recent years, enjoyed a moderate upturn (+1,100) this year, primarily because of continued demand for durable goods (+2,500). New orders for 1984 model automobiles resulted in higher job levels in the automobile and automobile-related industries. The transportation equipment industry, which has suffered sharp November declines in the past two years, added 200 jobs despite a strike in the motor vehicle and motor vehicle parts and accessories component. The largest hard goods increase in employment occurred in the fabricated metals industry (+900), up in nearly all portions of the industry, especially the hardware segment, where workers were returning to their jobs following a labor-management dispute. Other notable payroll advances appeared in the electrical machinery (+700), instruments, photo, and optical goods (+700), and nonelectrical machinery (+400) industries, which were hiring because of increased product demand. Seasonal losses in the primary metals (-400) and stone, clay, glass and concrete (-100) industries softened the above job advances. Furniture payrolls fell by 100 because of a strike in the office furniture component.

Nondurable goods jobs in November declined 1,300, much less than in previous years, as seasonal cutbacks were less severe than expected. Most of the soft goods downturn occurred in the apparel (-1,200) and food (-800) industries. Employee furloughs in the women's outerwear industry dominated the reduction in apparel jobs, while payroll losses in the canning industry accounted for most of the drop in food employment. Job gains outweighed losses in the remaining soft goods industries.

Since November 1982, the state has added 45,900 jobs to its nonfarm payrolls, with all of the expansion in the nonmanufacturing sector (+51,700), particularly services (+34,900) and trade (+21,700). In addition, manufacturing payrolls fell only 5,900 from last November's job level. By comparison, factory job losses averaged over 50,000 from the third quarter of 1982 to the third quarter of 1983.

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for October 1983 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
358	Refrigeration & service machinery	$391.76	41.5	$9.44
362	Electrical industrial apparatus	478.40	41.6	11.50
384	Medical & dental instruments and supplies	287.89	39.6	7.27
205	Bakery products	352.26	38.0	9.27

[3] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

Table A-4. AVERAGE WEEKLY HOURS AND AVERAGE OVERTIME HOURS OF PRODUCTION WORKERS IN SELECTED MANUFACTURING INDUSTRIES, NEW YORK STATE

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1982 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--Hours, Average Weekly Overtime. Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.
[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles.* SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or –	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Compiled on a fiscal year basis for the state, selected major labor areas, New York City, and the Suburban District (Westchester, Rockland, and Putnam counties).
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1982.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports**.
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

13. **Occupational Brief.** To date, occupational briefs have been prepared for: *Air-Conditioning, Refrigeration,* and *Heating Mechanic, Air-Traffic Controller, Bank Teller, Computer Programmer, Dental Hygienist, Flight Attendant, Insulation Worker, Machinist, Medical Office Assistant, Occupational Therapist, Physical Therapist,* and *Police Officer.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. September 1983.

14. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative action plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

15. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

16. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State.* The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00.

17. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females; blacks; American Indians, Eskimos, and Aleuts; Asians and Pacific Islanders; and persons of Hispanic origin. Percent distributions are also shown. March 1983.

B-PUBLICATIONS

209. Statistics on Minorities and Women. Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

210. Occupational Injuries and Illnesses in New York State, 1974. This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. Separation Pay in Union-Management Agreements, 1975. Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. Addendum to Statistics on Minorities and Women. Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209), published in 1976.

218. Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975. Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

220. A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977. A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

222. Provisions of Union Agreements in Hospitals and Homes in New York State, 1975. This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. Union Contracts in New York State, Coverage and Characteristics, 1979. Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. The Garment Industry in New York State. A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. Characteristics and Costs of Work Injuries in New York State, 1966-1970. Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. Private Pension Plans in New York State, 1971. Study includes summaries of 279 large private pension plans. Price $3.00.

246. Directory of Employee Organizations in New York State, 1981. This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

79-2. Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978. This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3. The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance. This report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. Prevailing Wage Information for Unemployment Insurance Administration. Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980. This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports**.

83-2. Prolonging Working Life. This report presents the findings of a survey designed to identify private-sector programs and practices that enhance employment opportunities or help to prolong the working lives of older workers--defined in this survey as those 55 years of age or older. The report describes variations from traditional work schedules, such as flexible working hours, compressed workweeks, part-time and/or temporary employment. Experiences of responding firms with various programs are presented in the report.

83-4. Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1981. Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1980-1981.

NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS - **Angelo J. Massa, Acting Director**

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
December 1983

Civilian Labor Force

The number of New York State residents with jobs in December 1983 was 7,412,000, a decline of 21,000 from a month ago, but an increase of 213,000 from a year ago.

Total unemployment in the state fell 29,000 between November and December 1983 to 555,000 or 119,000 below December 1982.

The state's rate of unemployment was down 0.3 of a percentage point from November 1983 to 7.0 percent in December 1983. The current rate was 1.6 percentage points less than the jobless rate recorded a year ago.

Nonfarm Employment

The state's nonagricultural wage and salary job count (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) surged upward 22,400 from November 1983 to 7,331,800 in December 1983, primarily on the strength of hiring in response to holiday sales in retail trade. The current upturn compared quite favorably with the average November-December job gain of 4,100 over the past five years.

The nonfactory sector reported 34,000 more jobs in December 1983 than a month ago as the trade division (+33,200) approached the all-time record high payroll level (within 2,000 jobs), reflecting temporary hiring, expecially among department stores. Other seasonal advances occurred in the public sector (+4,200) and the finance, insurance, and real estate group (+2,800). The bulk of the expansion in government jobs could be traced to staff buildup among post offices to handle Christmas mail and in local education. Virtually all categories of the finance, insurance, and real estate divison experienced larger payrolls in December, with the brokerage industry accounting for over half of the job expansion. The transportation and public utilities group added 2,100 jobs to its month-ago tally, with hires in the trucking and communications industries responsible for over three-quarters of the upturn. The majority of industry components in the services division (+1,900) registered higher job levels as stepped-up business activity in the business services industry provided the largest payroll boost. Seasonal cutbacks in private education and recreational and amusement services industries softened the services upturn. The arrival of cold weather prompted further furloughs in the construction (-9,800) and mining (-300) industry groups.

Manufacturing employment decreased 11,600 in December 1983, considerably less than the average November-December loss over the last five years (-17,200). The nondurable goods segment (-11,100) accounted for most of the factory downturn with nearly half of the soft goods job reduction centered in the apparel industry (-5,300)--the largest loss in apparel jobs occurred in the women's outerwear industry. The food (-2,000) and miscellaneous manufacturing (-1,600) industries also reported notable soft goods job losses. Nearly all of the loss in food payrolls was attributable to layoffs in the meat product and canning industries. Half of the drop in miscellaneous manufacturing employment was centered in the highly seasonal toy-making industry.

The November-December decline of 600 durable goods jobs was slightly less-than-expected as seasonal cutbacks in several industries were smaller than usual. The fabricated metals industry, which is normally down considerably in December, lost only 100 jobs over the month--hiring in the metal forging and stamping portion nearly offset job losses elsewhere in the industry. The largest hard goods decreases occurred in the primary metals (-600) and instruments, photo, and optical goods (-600) industries. Payroll reductions in the blast furnace industry comprised the bulk of the decline in primary metals employment. Continued cutbacks in the photographic industry dominated the drop in instruments jobs. Job gains in the nonelectrical machinery (+800) and transportation equipment (+500) industries tempered the hard goods retrenchment. Demand for office, computing, and accounting machines prompted the rise in nonelectrial machinery payrolls, while seasonal job gains in the motor vehicle parts and equipment and aircraft industries caused the rise in transportation equipment employment.

The December 1983 nonfarm job level was 70,100 above the figure recorded a year ago, and was the third consecutive month that the state's job count exceeded that of a year ago. All of the increase was in the nonmanufacturing sector (+70,400), particularly services (+36,000) and trade (+31,300).

Table B-2. EMPLOYEES, EARNINGS AND HOURS IN NONAGRICULTURAL ESTABLISHMENTS, BY INDUSTRY NEW YORK CITY–Continued

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory workers in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for November 1983 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
33	Primary metal industries	$313.39	37.0	$8.47
20	Food and kindred products	378.82	40.3	9.40
205	Bakery products	367.08	39.9	9.20
206	Sugar and confectionery products	392.21	43.1	9.10
234	Women's, children's, infants' undergarments	219.52	34.3	6.40
265	Paperboard containers and boxes	366.87	40.9	8.97
31	Leather and leather products	204.95	37.4	5.48
314	Footwear, except rubber	205.33	37.4	5.49
15-17	Construction	589.26	36.6	16.10

[3] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

INSURED EMPLOYMENT AND PAYROLLS
SECOND QUARTER 1983

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January 1960, an employer of individuals other than household workers becomes liable for the unemployment insurance tax if within a single calendar quarter he pays remuneration of $300 or more. As a result of an amendment effective January 1966, an employer who employs one or more household workers and pays them cash remuneration of $500 of more within a single calendar quarter becomes liable for the tax. In effect, employers of one or more workers become liable for the unemployment insurance tax on the first day of the calendar quarter in which remuneration is paid.

Most persons employed by nonprofit organization were covered by unemployment insurance beginning January 1, 1971 as a result of "stand-by" legislation originally enacted in 1965 which became operative because of the federal amendments of 1970.

A nonprofit organization becomes liable when it makes cash payments to its employees of $1,000 or more in a calendar quarter. Effective January 1, 1972, liability also begins if the nonprofit organization employs four or more persons on each of 20 days in at least 20 different weeks during the current or preceding calendar year.

Prior to January 1, 1978, the services of persons engaged in a teaching or other professional capacity at a nonprofit educational institution below the college level were excluded from covered employment. Beginning January 1, 1978, the services of these employees are covered by unemployment insurance.

Agricultural labor is also newly covered as of January 1, 1978. Exceptions exist for employers of fewer than 10 persons or those with a quarterly payroll of less than $20,000.

Certain groups continue to be excluded from coverage. Those excluded are interstate railroads, self-employed, services of an individual employer's wife, husband or minor child and certain other small groups of workers.

Data for employees of the federal government, New York State, and local government units covered for unemployment compensation purposes are excluded from this series. Employment and payrolls of persons in private industry only are reported in this series.

Insured employment data are not intended to reflect a continuous series over the years. The data only represent experience within a specific calendar period. Significant factors which affect comparability are changes in the coverage provisions of the law, such as those mentioned above, as well as employment reclassification changes. The reclassification changes are occasioned by industrial and/or geographic classification code changes. They may be economic or noneconomic. Economic code changes are made in the quarter when the product or business activity of an establishment has changes (industry code) or whenever an employer moves from one location to another in New York State (geographic code). Noneconomic code changes are made effective in the first quarter of each year. Noneconomic code changes arise from (1) structural changes in the *Standard Industrial Classification Manual*, and (2) newly disclosed information affecting either the industrial or geographic location.

REPORTING UNIT. An establishment, or reporting unit, is usually a single place of business, engaged in a single business activity, and operated by a single employer. Business firms operating more than one establishment, in different counties, or different activities in one or more counties, usually submit a separate report for each unit unless the payrolls are not maintained separately. However, if an employer operates two or more establishments in a single county that are engaged in the same business activity, the establishments usually are reported together as a single unit. If two or more units of a single employer are in a single physical location but maintain separate payroll records and engage in distinct or separate business activities, then each unit is treated as a separate reporting unit.

EMPLOYMENT. The tables in this report include all private employment covered under the New York State Unemployment Insurance Law for each of the three months in the quarter. The employment count represents the number of full-time and part-time employees earning wages or salaries for the payroll period including the 12th of the month. Included are persons on paid vacations and on paid sick leave. Workers temporarily earning no wages because of labor-management disputes, layoffs or other reasons are not reported as employed. Persons on the payroll of more than one establishment during the same reference week are reported more than once.

TOTAL QUARTERLY PAYROLLS. Total quarterly payrolls cover *all wages and salaries* paid to individuals in insured employment.

INDUSTRIAL CLASSIFICATION. Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification Manual* prepared by the U.S. Office of Management and Budget. This edition replaces the 1967 edition. Structural changes as a result of revisions in the *Manual* are incorporated in data beginning with the first quarter of 1975.

When a 2-digit manufacturing industry has less than 100 employees or less than four reporting units, figures are combined in "all other durable goods" or "all other nondurable goods."

The category "all other" includes agriculture, forestry and fisheries, mining and unclassified establishments.

COUNTY CLASSIFICATION. County classification of employment and payroll data is based on the physical location of the establishment. The category "statewide" which appears at the end of the county listing covers all reporting units not classified by county. Included in this category are: reporting units without a fixed location within the State, those with a significant number of employees in more than one county for which separate data are not available, and those for which county location has not yet been determined.

LABOR AREA. A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purpose of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and employment service program) is given below.

--**Albany-Schenectady-Troy*. Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
-- *Binghamton*. Broome and Tioga counties.
--**Buffalo*. Erie and Niagara counties.
--**Nassau-Suffolk*. Nassau and Suffolk counties.
-- *New York City*. Bronx, Kings, New York, Queens and Richmond counties.
--**Rochester*. Livingston, Monroe, Ontario, Orleans and Wayne counties.
--**Syracuse* Madison, Onondaga and Oswego counties.
--**Utica-Rome*. Herkimer and Oneida counties.
-- *Westchester*. Westchester County.

*Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget (OMB).

SOURCE OF DATA. Reports submitted quarterly by employers subject to the New York State Unemployment Insurance Law.

[1] These figures include employees located overseas and out of State.

INSURED EMPLOYMENT IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE
SECOND QUARTER 1983

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1982 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

---

[1] Subarea of New York City area.

[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or -	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Compiled on a fiscal year basis for the state, selected major labor areas, New York City, and the Suburban District (Westchester, Rockland, and Putnam counties).
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1982.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

13. **Occupational Brief.** To date, occupational briefs have been prepared for: *Air-Conditioning, Refrigeration,* and *Heating Mechanic, Air-Traffic Controller, Bank Teller, Computer Programmer, Dental Hygienist, Flight Attendant, Insulation Worker, Machinist, Medical Office Assistant, Occupational Therapist, Physical Therapist,* and *Police Officer.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. September 1983.

14. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative action plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

15. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

16. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State.* The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00.

17. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females; blacks; American Indians, Eskimos, and Aleuts; Asians and Pacific Islanders; and persons of Hispanic origin. Percent distributions are also shown. March 1983.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209), published in 1976.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** This report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Administration.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

83-2. **Prolonging Working Life.** This report presents the findings of a survey designed to identify private-sector programs and practices that enhance employment opportunities or help to prolong the working lives of older workers--defined in this survey as those 55 years of age or older. The report describes variations from traditional work schedules, such as flexible working hours, compressed workweeks, part-time and/or temporary employment. Experiences of responding firms with various programs are presented in the report.

83-4. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1981.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1980-1981.

Explanation of Data i

List of Publications iv

MONTH IN REVIEW
January 1984

Civilian labor force estimates have been adjusted to the 1983 Current Population Survey benchmark. Nonagricultural wage and salary estimates have been adjusted to the 1983 Current Employment Statistics benchmark. These estimates supersede those previously published.

Civilian Labor Force

The number of New York State residents with jobs in January 1984 was 7,251,000, a decline of 146,000 from a month ago, but an increase of 126,000 from a year ago.

Total unemployment in the state in January 1984 was 637,000, a seasonal jump of 83,000 over December 1983's jobless figure, and an improvement of 116,000 from the year-ago jobseeker level of 753,000.

The rise in unemployment, coupled with the drop in employment, caused the state's jobless rate to increase 1.1 percentage points over the month to 8.1 percent in January 1984. Since January 1983, the rate of unemployment has fallen 1.5 percentage points.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) fell 171,600 from December 1983 to a level of 7,269,100 in January 1984. Nonmanufacturing job losses accounted for 89 percent of the nonfarm reduction. The January 1984 downturn was 26,000 less than the average December-January job decrease over the last five years.

Seasonal influences caused nonmanufacturing payrolls to drop 152,400 between December 1983 and January 1984, as all industry divisions shared in the downturn. Nearly half of the job reduction occurred in the trade division (-73,300) with layoffs of Christmas help, particularly among retail department stores, accounting for the largest portion of the decrease. However, the decline in trade employment was slightly smaller than usual as some of the staff hired for the holidays was retained because of January sales campaigns. The services (-28,700), construction (-23,700), and government (-17,000) groups also reported large job losses. The majority of services components experienced over-the-month payroll cuts with well over half of the decline in business services and in private eduation, which furloughed nonteaching personnel during the mid-winter recess. Employment in the construction industry continued to approach its expected February low point, with the special trade contractor segment responsible for the largest share of the job reduction. The bulk of the decline in the public sector occurred in local education as community colleges closed for the mid-year recess, and among post offices, which laid off temporary help hired to handle holiday mail. The transportation and public utilities (-6,900), finance, insurance, and real estate (-2,200), and mining (-600) divisions posted smaller job decreases. A seasonal slowdown in trucking activity following the holidays dominated the decline in transportation and public utilities jobs, while expected cutbacks in the real estate industry were responsible for most of the finance, insurance, and real estate downturn.

The December 1983-January 1984 decline of 19,300 manufacturing jobs was about two-thirds of the average job loss in recent years for this period. The need to complete production schedules established in late 1983 kept January layoffs to a minimum. Anticipated cutbacks in nondurable goods jobs (-14,900) accounted for most of the factory downturn with the severest employment losses in the miscellaneous manufacturing (-3,500), apparel (-3,200), textile (-2,600), and food (-2,200) industries.

The durable goods job level edged downward 4,400 in January, about half the expected loss for this time of year. All hard goods industries shared in the job decline with cutbacks in nonelectrical machinery (-1,300) accounting for the largest decrease. Payroll reductions in the electronic computing segment were responsible for most of the nonelectrical machinery job decline.

Nonfarm employment in January 1984 was 159,600 above a year ago as all industry divisions experienced higher payrolls. Two-thirds of the job expansion occurred in the services (+64,700) and trade (+42,000) groups. ■

ANNUAL REVISIONS OF NONFARM EMPLOYMENT ESTIMATES NEW YORK STATE, NEW YORK COMBINED AREA, NEW YORK CITY AND UPSTATE AREAS BY INDUSTRY, 1982-1983

MONTLY estimates of wage and salary workers in nonfarm establishments in New York State, the New York Combined Area, New York City, Westchester, Rockland, Nassau-Suffolk and the upstate areas by industry for the years 1982-1983 presented on pages 5 to 58 reflect the annual revisions to the 1982 benchmark. These estimates supersede those previously published for 1982 and 1983 in the January 1983 through December 1983 issues of the *Employment Review.*

The estimates also include data for the Glens Falls and Newburgh-Middletown areas which had not been published previously.

Employment estimates are adjusted to reflect revisions in the benchmarks of the covered and noncovered segments of the nonagricultural employment series. Employment estimates for establishments covered by the New York State Unemployment Law were adjusted to employment levels through 1983. Employment estimates for the noncovered sector such as interstate railroads, nonprofit religious, charitable, scientific, social and educational organizations and portions of government were adjusted based upon the latest information made available through the U.S. Bureau of Labor Statistics and other governmental agencies.

EMPLOYEES IN NONAGRICULTURAL ESTABLISHMENTS, BY INDUSTRY, NEW YORK STATE, 1982-1983
(In thousands. Because of rounding, detail may not add to totals)

Industry	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Avg.
							1982

Nondurable goods	370.78	40.7	9.11
Food and kindred products	358.64	41.8	8.58
Paper and allied products	379.90	42.4	8.96
Printing, publishing and allied industries	343.40	36.3	9.46

EARNINGS AND HOURS IN NONAGRICULTURAL ESTABLISHMENTS
ANNUAL AVERAGES, UTICA-ROME, 1983

Industry	Average weekly earnings	Average weekly hours	Average hourly earnings
Manufacturing	$329.20	40.0	$8.23
Durable goods	364.67	40.7	8.96
Primary metal industries	396.32	40.9	9.69
Fabricated metal products	380.14	40.7	9.34
Machinery, including electrical and transportation equipment	359.04	40.8	8.80
Food and kindred products	334.76	39.9	8.39
Textile mill products	210.41	39.7	5.30
Apparel and other textile	222.52	36.3	6.13
Leather and leather products	169.67	38.3	4.43

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for December 1983 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
344	Fabricated structural metal products	$379.32	42.1	$9.01
394	Misc. fabricated metal products	328.34	41.3	7.95
35	Machinery, except electrical	452.62	42.7	10.60
358	Refrigeration & service machinery	437.42	42.8	10.22
367	Electronic components & access.	295.68	42.0	7.04
371	Motor vehicles & motor vehicle equipment	602.62	43.7	13.79
382	Measuring & controlling instr.	345.58	43.8	7.89
238	Miscellaneous fabricated textile products	202.54	33.7	6.01
531	Department stores	168.21	30.2	5.57

[3] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

Table A-4. AVERAGE WEEKLY HOURS AND AVERAGE OVERTIME HOURS OF PRODUCTION WORKERS IN SELECTED MANUFACTURING INDUSTRIES, NEW YORK STATE

Table B-2. EMPLOYEES, EARNINGS AND HOURS IN NONAGRICULTURAL ESTABLISHMENTS, BY INDUSTRY NEW YORK CITY--Continued

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory workers in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for December 1983 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
33	Primary metal industries	$302.88	37.3	$8.12
349	Misc. fabricated metal products	287.74	40.3	7.14
355	Special industry machinery	371.55	41.7	8.91
22	Textile mill products	230.25	37.5	6.14
238	Miscellaneous apparel & accessories	208.46	34.4	6.06
27	Printing, publishing and allied ind.	472.87	36.6	12.92
275	Commercial printing	483.98	37.9	12.77
31	Leather and leather products	208.87	37.1	5.63
314	Footwear, except rubber	224.72	36.9	6.09
	Hotels (year-round)	329.82	35.2	9.37

[3] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 56,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1983 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and nightshift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--Hours, Average Weekly Overtime. Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--*_Albany-Schenectady-Troy Area._ Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--*_Binghamton Area._ Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--*_Buffalo Area._ Erie and Niagara counties.
--*_Elmira Area._ Chemung County.
--*_Glens Falls Area._ Warren and Washington counties.
-- _Monroe Area._ Monroe County.
--*_Nassau-Suffolk Area._ Nassau and Suffolk counties.
--*_Newburgh-Middletown Area._ Orange County.
-- _New York City._ Bronx, Kings, New York, Queens and Richmond counties. [1]
-- _New York City Area._ Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- _New York Combined Area._ Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--*_Poughkeepsie Area._ Dutchess County.
--*_Rochester Area._ Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- _Rockland Area._ Rockland County.
--*_Syracuse Area._ Madison, Onondaga and Oswego counties.
--*_Utica-Rome Area._ Herkimer and Oneida counties.
-- _Westchester Area._ Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.
[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or –	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Compiled on a fiscal year basis for the state, selected major labor areas, New York City, and the Suburban District (Westchester, Rockland, and Putnam counties).
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1982.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

13. **Occupational Brief.** To date, occupational briefs have been prepared for: *Air-Conditioning, Refrigeration,* and *Heating Mechanic, Air-Traffic Controller, Bank Teller, Computer Programmer, Dental Hygienist, Flight Attendant, Insulation Worker, Machinist, Medical Office Assistant, Occupational Therapist, Physical Therapist,* and *Police Officer*. The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. September 1983.

14. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative action plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

15. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

16. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State*. The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00.

17. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females; blacks; American Indians, Eskimos, and Aleuts; Asians and Pacific Islanders; and persons of Hispanic origin. Percent distributions are also shown. March 1983.

B-PUBLICATIONS

209. **Statistics on Minorities and Women.** Presents data from the 1970 Census on population, labor force and unemployment for minority group members and females, by SMSA and county, to help employers and government agencies develop, implement and evaluate Affirmative Action Programs. April 1976.

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

214. **Addendum to Statistics on Minorities and Women.** Provides information on the distribution of women and minorities in greater detail than was included in the parent publication, *Statistics on Minorities and Women* (see Publication B-209), published in 1976.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** This report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Administration.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

83-2. **Prolonging Working Life.** This report presents the findings of a survey designed to identify private-sector programs and practices that enhance employment opportunities or help to prolong the working lives of older workers--defined in this survey as those 55 years of age or older. The report describes variations from traditional work schedules, such as flexible working hours, compressed workweeks, part-time and/or temporary employment. Experiences of responding firms with various programs are presented in the report.

83-4. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1981.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1980-1981.

EMPLOYMENT REVIEW

FEBRUARY 1984
VOL. 37 NO. 2

1983 in Review

STATE OF NEW YORK
Mario M. Cuomo, Governor

DEPARTMENT OF LABOR
Lillian Roberts, Commissioner

NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS - **Angelo J. Massa, Acting Director**

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
February 1984

Civilian Labor Force

Resident employment in New York State in February 1984 was 7,346,000, or 95,000 higher than a month ago and 202,000 more than a year ago.

Total unemployment in the state increased 12,000 between January and February 1984 to 649,000. Since February 1983, the number of jobseekers has declined 103,000.

The gain in employment was sufficient to offset the rise in unemployment, causing the state's February 1984 jobless rate to remain unchanged from January at 8.1 percent. The February 1984 rate was 1.4 percentage points lower than the rate recorded a year ago.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) rose 27,700 from January 1984 to 7,296,400 in February 1984 with nearly 60 percent of the upturn in the nonmanufacturing sector. The current payroll expansion contrasted sharply with the minor gain of 3,100 jobs recorded from January to February 1983.

Nonmanufacturing employers in February 1984 added 16,100 jobs to their January payrolls as seasonal gains in services (+19,300), government (+11,600), and finance, insurance, and real estate (+400) overshadowed employment losses in the other nonfactory divisions. The return to work of nonteaching personnel among private colleges and universities and hiring by membership organizations and business services firms dominated the rise in services jobs. Approximately 80 percent of the public sector job upturn occurred in the local education segment as nonteaching staff at community colleges were recalled after the midwinter recess. The increase in finance, insurance, and real estate payrolls was centered in the security and commodity brokerage industry. The trade (-10,400) and construction (-3,500) groups registered the largest nonfactory job losses. Department stores accounted for the bulk of the downturn in trade as staff hired to handle holiday and January sales campaigns were laid off. Construction employment fell to its low for the year. The job counts in the finance, insurance, and real estate, trade, and services divisions attained record high employment levels for the month of February.

Manufacturing jobs in February 1984 increased 11,700 from a month ago because of seasonal restaffing by nondurable goods employers. Over 60 percent of the soft goods payroll expansion occurred in the apparel industry (+7,400), where job additions to the women's outerwear portion accounted for most of the upturn. The miscellaneous manufacturing (+2,200), leather (+1,200), and rubber and plastics products (+1,200) industries also reported significant employment increases. Hiring in the toy-making industry sparked the advance in miscellaneous manufacturing jobs, while the increase in leather employment was industrywide. Orders for plastics products prompted the job buildup in the rubber and plastics industry.

Durable goods employment in February 1984 showed no change in its job level from January as minimal gains in some industries offset minor losses in others. The largest job decreases occurred in the stone, clay, glass and concrete (-300) and primary metals (-300) industries. Half of the decline in stone, clay, glass and concrete employment could be traced to a temporary plant shutdown in the glassware industry, while a temporary closing of an iron and steel foundry accounted for nearly all of the downturn in the primary metals industry. Among the hard goods industries, which enjoyed higher employment in February, the electrical machinery industry (+200) posted the most notable increase because strikers in the internal combustion engine segment were returning to their jobs. Seasonal job gains occurred in the furniture (+200) and nonelectrical machinery (+200) industries.

February 1984 marked the sixth consecutive month that the state's nonfarm job total exceeded that of a year ago as the count rose 183,800 above the February 1983 level. Services (+72,200) and trade (+53,000) reported the largest over-the-year improvement among industry divisions. ■

Table 1. LABOR FORCE STATUS OF THE CIVILIAN NONINSTITUTIONAL POPULATION 16 YEARS AND OVER NEW YORK STATE, 1970 TO DATE

(Numbers in thousands)

Year and month		Civilian noninstitutional population	Civilian labor force					Not in labor force
			Number	Percent of population	Employed	Unemployed

[1] Unemployed as percent of combined total of employed and unemployed.

1983 IN REVIEW

Vincent F. DeSantis, John P. Wong and Roger W. Gerby

Civilian Labor Force
(16 years and over)

The state's civilian labor force, reached a record high in 1983 as both employment and unemployment increased. The labor force grew 71,000 (0.9 percent) to 8,062,000 in 1983 following a shrinkage of 12,000 in 1982. In recent years, the number of New Yorkers in the labor force has declined as economic opportunities became scarce and expanded as they improved.

Total employment expanded 66,000 to 7,373,000 from 1982 to 1983, the highest level since 1981, as an economic turnaround took hold in mid-1983 and grew stronger as the year progressed. The growth in 1983, although virtually limited to the second half of the year, was the first significant increase in employment since 1979.

In 1983, the number of jobless state residents rose slightly by 5,000 to 689,000--the highest level in six years. Although unemployment has risen each year since 1979, by the end of 1983, unemployment was falling rapidly.

The unemployment rate, at 8.6 percent, was unchanged from 1982 to 1983 but the two years were not carbon copies of each other. During 1982, the labor market worsened during the second half, but in 1983 the jobless situation improved considerably during the second half of the year.

While the overall unemployment rate remained unchanged from 1982 to 1983, the percentage of unemployed declined among some demographic groups and rose among others.

Race

The jobless rate for blacks increased to 14.5 percent (+0.7 of a percentage point) after declining from 1981 to 1982 (-0.9 of a percentage point). Meanwhile, the unemployment rate for whites receded slightly to 7.7 percent (-0.1 of a percentage point) in 1983 after a considerable climb in 1982 (+1.2 percentage points). In 1983, labor force participation on the part of whites inched up 59.7 percent (+0.1 of a percentage point) but participation declined for blacks to 56.4 percent (-0.7 of a percentage point) as black population increased at a faster pace than the black labor force. In 1982, participation in the labor force declined for both blacks and whites.

Both Sexes, 16-19 years

In 1983, the unemployment rate for teenagers, already high, increased 2.5 percentage points to 24.8 percent. The jobless rate for white youth climbed 1.3 percentage points to 21.9 percent while the rate of unemployment for black teenagers rose 5.1 percentage points to 45.5 percent. Overall, labor force participation on the part of teenagers declined slightly. The black youth participation rate, however, increased in 1983.

Men and Women

From 1982 to 1983, the jobless rate for men moved up 0.4 percentage point to 8.9 percent, increasing considerably more for black men than for white men. In contrast, the unemployment rate for women receded 0.6 of a percentage point to 8.1 percent, with the jobless rate for black women decreasing more than the unemployment rate for white women. Participation in the labor force increased slightly for men and declined moderately for women.

Hispanic Origin

The jobless rate for persons of Hispanic origin decreased 1 percentage point in 1983 to 12.3 percent after climbing 2 percentage points in 1982. Unemployment declined for both Hispanic men and women but more so for women. The decline in the unemployment rate of Hispanics reflected less participation in the labor force and not an increase in employment.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) averaged 7,285,300 in 1983, or 30,700 higher than in 1982. However, the 1983 nonfarm job count was 2,000 less than the record-high level reached in 1981. The bulk of the 1982-1983 job growth occurred during the closing months of the year as the recovery from the latest national recession gained momentum within New York State following the mid-1983 turnaround in the state's job market.

The number of nonmanufacturing jobs rose 83,900 from 1982 to an average of 5,986,000 in 1983, a new record high. This was the fifth consecutive year that nonfactory payrolls surpassed previous records, again demonstrating the ability of New York State's nonmanufacturing industries--which are mostly service oriented--to better withstand the effects of a national recession than goods-oriented industies. All nonmanufacturing industry divisions shared in the 1982-1983 job upturn, except for the transportation and public utilities group (-13,300). The expansion in services payrolls (+47,800), although relatively small when compared to most other

Government	+0.4	-6.6	+7.4

job increases in recent years, nevertheless accounted for over half of the nonfactory employment pickup. Jobs in the trade division averaged 24,500 higher in 1983 than in 1982, the largest gain in five years. Much of the improvement in trade employment occurred towards the end of the year, a time when increased consumer confidence and personal income produced banner holiday sales. The finance, insurance, and real estate group (+15,800) experienced essentially the same number of job additions in 1983 as in 1982. The volume of construction jobs rose 8,300 between 1982 and 1983 to the highest employment level since 1974. The mining industry added 500 jobs to its 1982 average, causing the 1983 job count to approach the pre-energy crisis job levels of the early 1970s.

The manufacturing sector averaged 1,299,300 jobs in 1983, a loss of 53,200 from 1982. However, most of the over-the-year factory deficit occurred during the first quarter of 1983 when jobs averaged 95,800 below the comparable period for 1982. Steady improvement among factory payrolls throughout the remainder of 1983 saw a year-to-year gain of 7,200 jobs by December. Stronger demand for both durable and nondurable goods, a result of increased consumer buying power, was a major factor in the year-end employment upswing.

For the year, durable goods employment was 35,000 less in 1983 than in 1982, accounting for nearly two-thirds of the factory job reduction, with annual average employment lower for eight of the nine major hard goods groups. In the first quarter, hard goods jobs had an over-the-year shortfall of 57,900, but by December 1983, employment was only down 1,000 from December 1982. A major factor behind the narrowed hard goods job gap was renewed demand for domestic cars--sparked by rising personal income, import quotas, and falling gasoline prices--prompting rehiring in the automobile and automobile-related industries. The historically robust instruments, photo and optical goods industry (-9,900) suffered its first setback in eight years because of severe cutbacks in the photographic equipment industry.

Nondurable goods payrolls in 1983 averaged 18,100 less than in 1982 as employment declined in eight of the 10 major soft goods groups. As in the hard goods group, the largest share of the soft goods retrenchment occurred during the first quarter of 1983--jobs were 37,900 below the first quarter 1982 level. By December, the soft goods payroll count had risen 8,200 above the comparable 1982 level. Although eight out of 11 major soft goods groups had lower annual average job levels in 1983 than in 1982, all groups experienced year-to-year improvement by December.

Unemployment Insurance Beneficiaries

A total of $1.6 billion was paid to jobless workers in New York State in 1983 under a variety of unemployment assistance programs. A year earlier, these benefits totaled $1.4 billion. In an average week of 1983, approximately 305,000 persons were collecting benefits under these programs, compared with 320,000 in 1982.

These programs provided up to a total of 44 weeks of jobless benefits during 1983 as described below:

- The New York State Unemployment Insurance Law provides for payment of up to 26 weeks of regular benefits to eligible jobless workers. These benefits are paid from the state Unemployment Insurance Fund, which is financed by contributions from New York employers. In 1983 as in 1982, $1.2 billion in benefits was paid to jobless worker under this program.

- Standby legislation under the Unemployment Insurance Law provides for the payment of an additional 13 weeks of extended benefits during periods of high insured unemployment to persons who have used up the basis 26-week allowance. This program "triggered" on in July 1980 and "triggered" off in January 1981 based on the national "trigger" computation. There were no extended benefits in 1982 and 1983.

- The federal Tax Equity and Fiscal Responsibility Act of 1982 created a Federal Supplemental Compensation Program (FSC). This program provides supplemental benefits after exhaustion of regular state benefits (and extended benefits, when payable)--100 percent federally financed--giving a claimant up to 20 additional weeks of benefits depending upon the insured unemployment rate (IUR) in the state. In New York, benefits were limited to a maximum of 18 weeks. Benefits, which first became payable for the week of unemployment beginning September 13, 1982, amounted to $320 million during 1983 and $94 million in 1982.

- There are programs that provide unemployment benefits to persons who worked for the federal government or were in the Armed Forces in the 52 weeks before initiating claims. These benefits are fully-financed by the federal government. Payments to ex-servicemen totaled $6 million in 1983 compared with $3 million in the previous year. Former federal employees received $10 million in unemployment benefits in both 1982 and 1983.

Hours and Earnings

In 1983, the average weekly wage of New Yorkers covered by unemployment insurance in the private wage and salary sector was $380.00 [1], up $22.92 or 6.4 percent from 1982. Production workers in manufacturing averaged weekly earnings of $347.41 up $23.43 or 7.2 percent from 1982. One year earlier, weekly earnings rose $15.08 or 4.9 percent. The average number of hours paid per week to factory production workers in 1983 was 39.3, or 0.5 of an hour more than in 1982. Average hourly earnings of production workers in 1983 reached $8.84, which was $0.49 higher than in 1982.

---

[1] Preliminary estimate.

Major Labor Areas

The number of New Yorkers with jobs increased in eight of the 12 major labor areas during 1983. The bulk of the statewide employment expansion was located in the Nassau-Suffolk area, where resident employment was up 64,500 (+5.2 percent) from the 1982 count. Among the remaining labor areas, the largest employment gains occurred in the Syracuse area, up 7,600 (+2.8 percent) and the Albany-Schenectady-Troy area, up 6,000 (+1.7 percent). The rise in the number of jobholders in the state was heavily tempered by a 36,600 (-1.1 percent) decline in the New York City Metropolitan area.

Although two-thirds of the major labor areas reported greater joblessness in 1983 than in 1982, total unemployment on a statewide basis showed little change (+5,000). The labor areas where the jobseeker level rose the most from 1982 to 1983 were the Rochester area, up 7,200 (+21.1 percent) and the Nassau-Suffolk area, up 5,200 (+6.2 percent). The decline in joblessness in the New York City Metropolitan area, down 6,400 (-2.0 percent) and the Buffalo area, down 3,600 (-5.2 percent) largely offset this rise. Smaller changes in the jobless level were posted by the remaining labor areas with the increases outweighing the decreases.

Six out of the 12 major labor areas enjoyed lower average unemployment rates in 1983 compared with 1982, while four major labor areas experienced higher jobless rates in 1983. The labor area with the largest annual average improvement was the Elmira area, down a full percentage point over the year to 10.5 percent, while the labor area with the largest increase in rate was the Rochester area, up 1.4 percentage points to 8.6 percent in 1983. The labor area with the highest average unemployment rate during 1983 was the Buffalo area, at 12.2 percent, down 0.5 of a percentage point. Poughkeepsie recorded the lowest 1983 rate among the major labor areas, 6.2 percent or 0.3 of a percentage point higher than in 1982 ■

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 60,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1983 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.

[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or -	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Compiled on a fiscal year basis for the state, selected major labor areas, New York City, and the Suburban District (Westchester, Rockland, and Putnam counties).
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1982.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

13. **Occupational Brief.** To date, occupational briefs have been prepared for: *Air-Conditioning, Refrigeration,* and *Heating Mechanic, Air-Traffic Controller, Bank Teller, Computer Programmer, Dental Hygienist, Flight Attendant, Insulation Worker, Machinist, Medical Office Assistant, Occupational Therapist, Physical Therapist,* and *Police Officer*. The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. September 1983.

14. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative action plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

15. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

16. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State.* The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00.

17. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females; blacks; American Indians, Eskimos, and Aleuts; Asians and Pacific Islanders; and persons of Hispanic origin. Percent distributions are also shown. March 1983.

SPECIAL REPORTS -- Continued

18. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

B-PUBLICATIONS

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** This report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Administration.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

83-4. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1981.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1980-1981.

EMPLOYMENT REVIEW

MARCH 1984
VOL. 37 NO. 3

STATE OF NEW YORK
Mario M. Cuomo, Governor

DEPARTMENT OF LABOR
Lillian Roberts, Commissioner

NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS - Angelo J. Massa, Acting Director

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
March 1984

Civilian Labor Force

Resident employment in the state rose 112,000 over the month to 7,458,000 in March 1984, the highest employment level for the month of March on record. Compared with March 1983, the current jobholder tally was higher by 224,000.

The number of unemployed persons in the state fell 31,000 from February 1984 to 618,000 in March 1984, or 172,000 less than the jobless count recorded a year ago.

The decline in unemployment, coupled with the sharp increase in employment, caused the state's rate of unemployment to drop 0.4 of a percentage point over the month to 7.7 percent in March 1984. New York's jobless rate was down by a hefty 2.1 percentage point from March 1983.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) advanced 53,200 from February 1984 to 7,350,000 in March 1984 with 89 percent of the job expansion in nonmanufacturing employment. Reflecting seasonal increases and an improving economy, the March 1984 upturn averaged 4,600 more jobs than for comparable periods over the last five years.

Nonmanufacturing employers in March 1984 added 47,100 jobs to their February payrolls as all industry divisions shared in the upturn. Over 75 percent of the job increase occurred in services (+16,200), trade (+10,800), and government (+9,100). Nearly every services industry experienced a higher job level, with the business services industry accounting for 35 percent of the service employment advance. Employment in wholesale and retail trade industries increased over the month with more than 40 percent of the pickup centered in the restaurant and fast food industry. The return to work by nonteaching personnel among community colleges and grade schools following the midwinter recess dominated the rise in public sector employment. The construction (+5,500) and finance, insurance, and real estate (+4,600) groups also posted notable job increases. Anticipation of milder weather prompted the expansion in construction payrolls. Continued job growth in the security and commodity brokerage industry highlighted the increase in finance, insurance, and real estate employment. The rise in transportation and public utilities jobs (+300) could be traced to the settlement of a labor-management dispute in the bus transportation industry and increased activity in the trucking industry. However, a layoff in the utility segment of the division tempered this increase.

Manufacturing employment in March 1984 advanced 6,100 from a month ago with soft goods job additions accounting for 5,300 or 87 percent of the factory upturn. The rise in nondurable goods payrolls was largely seasonal as the majority of soft goods industries posted higher job levels than a month ago. The apparel industry (+2,300) dominated the expansion, despite a large strike in the fur goods component. The bulk of the apparel job boost was located in the women's outerwear segment. The textile (+800) and miscellaneous manufacturing (+800) industries posted large payroll advances. All of the increase in textile jobs occurred in the knitting mill segment, while hiring in the toy-making industry accounted for the largest share of the miscellaneous manufacturing upturn.

Hard goods employment edged upward 700 between February and March 1984. The transportation equipment industry (+400) reported the largest hard goods job gain, primarily because of increased demand for automobile parts and accessories. Employment in the remaining hard goods industries showed very little change over the month.

The March 1984 nonfarm job count was 177,100 above the level recorded a year ago. All industry divisions shared in the upturn, with two-thirds of the over-the-year gain in the services (+68,700) and trade (+49,600) groups. ■

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 60,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1983 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--Hours, Average Weekly Overtime. Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties.[1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.[2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.

[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or –	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Compiled on a fiscal year basis for the state, selected major labor areas, New York City, and the Suburban District (Westchester, Rockland, and Putnam counties).
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1982.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

13. **Occupational Brief.** To date, occupational briefs have been prepared for: *Air-Conditioning, Refrigeration,* and *Heating Mechanic, Air-Traffic Controller, Bank Teller, Computer Programmer, Dental Hygienist, Flight Attendant, Insulation Worker, Machinist, Medical Office Assistant, Occupational Therapist, Physical Therapist,* and *Police Officer*. The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. September 1983.

14. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative action plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

15. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

16. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State*. The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00.

17. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females; blacks; American Indians, Eskimos, and Aleuts; Asians and Pacific Islanders; and persons of Hispanic origin. Percent distributions are also shown. March 1983.

SPECIAL REPORTS -- Continued

18. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

B-PUBLICATIONS

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** This report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Administration.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports**.

83-4. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1981.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1980-1981.

MONTH IN REVIEW
April 1984

Civilian Labor Force

The number of New Yorkers with jobs declined 38,000 from March 1984 to 7,420,000 in April 1984. Since April 1983, resident employment has increased 180,000. The current employment figure was at a record-high level for the month of April.

Joblessness in the state in April 1984 totaled 516,000, a drop of 102,000 from a month ago and a gain of 197,000 from a year ago.

The reduction in unemployment caused the state's jobless rate to fall 1.2 percentage points from March 1984 to 6.5 percent in April 1984--the lowest April rate since 1974. Over the past 12 months, the rate of unemployment has declined 2.5 percentage points.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) swelled 66,000 from March 1984 to 7,417,300 in April 1984 with all of the job growth in the nonmanufacturing sector. The April 1984 job expansion was 27,700 more than the average increase for comparable periods over the last five years, reflecting continued economic growth.

Nonmanufacturing employment swelled 67,400 between March and April 1984, exceeding comparable job gains over the last five years by more than 20,000. Larger-than-seasonal advances in the services (+22,000) and trade (+19,800) divisions accounted for nearly two-thirds of the nonmanufacturing upturn. Almost all component industries contributed to the services upsurge, with the largest job increases in agricultural services, recreation and amusement services, and business services.

All trade industries experienced higher job levels, with hiring by restaurants and fast food chains accounting for over half of the expansion. The arrival of spring weather marked the usual buildup in construction activity with employment climbing 15,400 above the month-ago count. The public sector (+5,600), finance, insurance, and real estate (+4,300) and mining (+500) groups registered less significant job gains. The majority of the rise in government employment occurred in local education as non-teaching personnel in some community colleges and public schools returned to work following late semester breaks. Increased activity in the real estate industry was largely responsible for the rise in finance, insurance, and real estate jobs. Jobs in the transportation and public utilities group (-200), the only nonmanufacturing divisions to show an over-the-month loss, fell because of labor-management disputes in the air transportation and communications segments.

Manufacturing employment declined 1,400 between March and April 1984, far less than the average for comparable periods over the last five years (-7,100). Milder than normal seasonal reductions in soft goods employment (-1,500), particularly in the apparel (-2,300) and miscellaneous manufacturing (-200) industries, coupled with the tempering effects of contraseasonal job gains in paper (+500), good (+300), and printing (+300), were the main reasons for the smaller-than-normal factory downturn.

Durable goods employment (+100) in April was essentially unchanged from a month ago as cutbacks in the photographic portion of the instruments industry (-900) and heavy strike activity in the primary metals industry (-700) offset job gains among the majority of hard goods components. Seasonal job additions in the concrete, gypsum and plaster portion of the stone, clay, glass and concrete industry (+800) dominated the hard goods employment expansion.

The state's April 1984 nonfarm job count was 186,500 above the year-ago level with services (+70,400) and trade (+50,000) accounting for nearly two-thirds of the expansion. The transportation and public utilities group (-2,800) was the only industry division that experienced lower employment than a year ago. ■

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for March 1984 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
346	Metal forging and stampings	$486.38	41.5	$11.72
385	Ophthalmic goods	296.68	39.4	7.53
232	Men's & boys' suits, coats & overcoats	206.60	37.7	5.48
238	Misc. apparel & accessories	209.24	34.7	6.03
282	Plastics materials, synthetic resins, etc.	477.36	44.2	10.80
531	Department stores	163.94	26.4	6.21

[3] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

Table A-4. AVERAGE WEEKLY HOURS AND AVERAGE OVERTIME HOURS OF PRODUCTION WORKERS IN SELECTED MANUFACTURING INDUSTRIES, NEW YORK STATE

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory workers in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for March 1984 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
380	Instruments; photographic, medical and optical goods	$223.04	32.8	$6.80
232	Men's and boys' furnishings and work clothing	218.69	38.3	5.71
264	Converted paper products, exc. boxes	298.15	39.7	7.51
284	Soap, cleaning, preparations, cosmetics, etc.	630.99	45.2	13.96
481,2	Telephone and telegraph	514.56	39.4	13.06
531	Department stores	208.40	27.1	7.69

[3] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

INSURED EMPLOYMENT AND PAYROLLS
THIRD QUARTER 1983

INSURED EMPLOYMENT AND PAYROLLS
THIRD QUARTER 1983

INSURED COVERAGE. Under the New York State Unemployment Insurance Law as a result of an amendment effective January [illegible] an employer of [illegible] workers becomes liable for the unemployment insurance tax if within [illegible] calendar quarter [illegible] of $500 or more. As a result of an amendment effective January [illegible] an employer who [illegible] workers and pays them cash remuneration of $500 or more within [illegible] the tax. In effect, employers of one or more workers become liable for the unemployment [illegible] calendar quarter in which remuneration is paid.

Most persons [illegible] unemployment insurance beginning January 1, 1971 as a result of [illegible] of the federal amendments of 1970.

A nonprofit [illegible] $1,000 or more in a calendar quarter. Effective [illegible] or more persons in each of 20 days [illegible]

Prior to [illegible] nonprofit educational [illegible] Beginning January 1, 1978, the services of [illegible]

Agricultural [illegible]
those [illegible]

[illegible] services of an [illegible]

[illegible]

[illegible] The coverage [illegible] The classification [illegible] New York State [illegible]

REPORT [illegible]

EMPLOYMENT [illegible]

TOTAL QUARTERLY PAYROLL [illegible] covered employers.

INDUSTRIAL CLASSIFICATION [illegible] the Standard Industrial Classification [illegible] Structure [illegible] of 1975.

When a 2-digit [illegible] employees in less than four reporting units, figures are combined in "all other durable goods [illegible]."

The category "all other" [illegible] mining and unclassified establishments.

COUNTY CLASSIFICATION — [illegible] employment and payroll data is based on the physical location of the establishment. [illegible] at the end of the county listing covers all reporting units not classified by county [illegible] without a fixed location within the State, those with a significant number of [illegible] which separate data are not available, and those for which county location [illegible].

LABOR AREA — A [illegible] of New York State in which there is a major concentration of [illegible] labor statistics a labor area includes a whole county or counties [illegible]. The composition of the major labor areas [illegible] insurance and employment service program) is given below:

—*Albany-Schenectady-Troy [illegible] Saratoga and Schenectady counties
— *Binghamton* [illegible]
—*Buffalo [illegible]
—*Nassau-Suffolk [illegible]
— *New York City* [illegible]
—*Rochester [illegible]
—*Syracuse [illegible]
—*Utica-Rome [illegible]
— *Westchester* [illegible]

*Geographic [illegible] Standard Metropolitan Statistical Area (SMSA) [illegible].

SOURCE OF DATA — [illegible] to the New York State Unemployment Insurance Law.

INSURED EMPLOYMENT IN SELECTED COUNTIES WITH EMPLOYMENT OF 100,000 OR MORE
THIRD QUARTER 1983

Data for 9 of the 10 counties in New York State in which average insured employment exceeds 100,000 or more are presented in the following tables. Westchester County is not included in this section as the industry detail for this county was shown in Table 4 in the preceding tables.

In order to safeguard the confidential nature of individual employer reports, data on some industries in some counties were consolidated into statistically valid groupings.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 60,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e. as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1983 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--Hours, Average Weekly Overtime. Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--*_Albany-Schenectady-Troy Area._ Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--*_Binghamton Area._ Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--*_Buffalo Area._ Erie and Niagara counties.
--*_Elmira Area._ Chemung County.
--*_Glens Falls Area._ Warren and Washington counties.
-- _Monroe Area._ Monroe County.
--*_Nassau-Suffolk Area._ Nassau and Suffolk counties.
--*_Newburgh-Middletown Area._ Orange County.
-- _New York City._ Bronx, Kings, New York, Queens and Richmond counties.[†]
-- _New York City Area._ Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- _New York Combined Area._ Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.[‡]
--*_Poughkeepsie Area._ Dutchess County.
--*_Rochester Area._ Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- _Rockland Area._ Rockland County.
--*_Syracuse Area._ Madison, Onondaga and Oswego counties.
--*_Utica-Rome Area._ Herkimer and Oneida counties.
-- _Westchester Area._ Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[†] Subarea of New York City area.
[‡] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or -	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Compiled on a fiscal year basis for the state, selected major labor areas, New York City, and the Suburban District (Westchester, Rockland, and Putnam counties).
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1982.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

13. **Occupational Brief.** To date, occupational briefs have been prepared for: *Air-Conditioning, Refrigeration,* and *Heating Mechanic, Air-Traffic Controller, Bank Teller, Computer Programmer, Dental Hygienist, Flight Attendant, Insulation Worker, Machinist, Medical Office Assistant, Occupational Therapist, Physical Therapist,* and *Police Officer.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. September 1983.

14. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative action plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

15. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

16. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State.* The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00.

17. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force, employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females, blacks; American Indians, Eskimos, and Aleuts; Asians and Pacific Islanders, and persons of Hispanic origin. Percent distributions are also shown. March 1983.

SPECIAL REPORTS -- Continued

18. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

B-PUBLICATIONS

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments in kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

220. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1977.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1977.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefits [illegible] institutions in the health care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements [illegible] New York State Labor Department, effective at some time during 1979. It excludes agreements [illegible] employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated [illegible] 1,253,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section [illegible] encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, [illegible] establishments and employment in other states, competition from imports. [illegible]

SPECIAL BULLETINS

Special Bulletins [illegible] payable to the New York State [illegible] and Employer [illegible] New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work [illegible] New York State, 1966-1970.** [illegible] the sources of accidents that account for most [illegible] compensation [illegible] and medical payments. ([illegible] volumes) Price $10.00

245. **Private Pension Plans in New York State, 1971.** [illegible] summarizes [illegible] private pension plans. Price $3.00

246. **Directory of Employee Organizations in New York State, 1981.** This publication lists names and addresses of principal or executive officers of [illegible] local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00

LABOR RESEARCH REPORTS

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** This report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Administration.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports**.

83-4. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1981.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1980-1981.

EMPLOYMENT REVIEW

MAY 1984
VOL. 37 NO. 5

Unemployment Insurance Tax Rates, 1984

STATE OF NEW YORK
Mario M. Cuomo, Governor

DEPARTMENT OF LABOR
Lillian Roberts, Commissioner

NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS - Angelo J. Massa, Acting Director

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
May 1984

Civilian Labor Force

Resident employment in New York State at 7,481,000 in May 1984 expanded 61,000 from April 1984. The current figure was a record-high for the month of May, and followed record-highs for March and April. The May 1984 jobholder level was 293,000 higher than a year ago.

The number of jobseekers across the state in May 1984 was down slightly from a month ago, declining 7,000 to 509,000, the lowest level for the month of May since 1979. Since May 1983, unemployment in the state has receded by 159,000.

New York's unemployment rate edged downward by 0.1 of a percentage point from April to 6.4 percent in May 1984, considerably lower than the 8.5 percent rate recorded a year ago.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) expanded by 59,500 from April 1984 to 7,476,800 in May 1984 with nine out of every 10 new jobs in nonmanufacturing. The May 1984 nonfarm job level was an all-time record-high for the current nonfarm series.

The nonmanufacturing sector's job count rose 54,500 between April and May 1984 to 6,165,800, a record high. The largest employment increases among the nonfactory industry divisions occurred in trade (+23,300) and construction (+15,700). Job gains among restaurants and fast-food chains accounted for nearly 60 percent of the trade upswing, while over half of the buildup in construction jobs was concentrated in the special trade contractor industry. The advance in services (+10,600), up mainly because of staff additions in the recreation and amusement services and hotel, motel, and trailer camp industries, was softened by job cutbacks among private colleges and universities. Finance, insurance, and real estate jobs expanded by 2,000 over the month on the strength of seasonal expansion in real estate employment. The transportation and public utilities division added 2,800 jobs to its April job count with the largest share of the employment advance in the air transportation industry. Cautious hiring by the local and suburban transportation and trucking industries kept the April-May expansion below average. The public sector's job count edged downward 200 over the month because of cutbacks in local education.

Manufacturing employment expanded 5,100 in May, the result of seasonal influences coupled with hiring to meet increased product demand. Job growth in the durable goods segment accounted for three out of four new factory jobs with the stone, clay, glass and concrete (+800) and electrical machinery (+800) industries dominating the hard goods advance. Stone, clay, glass and concrete employment rose as expected because of job additions in the concrete, gypsum and plaster industry. The electrical machinery industry's job count was higher than a month ago, primarily because of hiring to accommodate new contracts for electronic components. Notable employment gains also occurred in the primary metals industry (+600), up because of the return of strikers to their jobs in the nonferrous metals segment, and in the instruments, photo and optical goods industry (+500), up because of job additions in the photographic equipment portion.

The over-the-month gain in nondurable goods employment (+1,300) was smaller than the usual May job increase. The soft goods job advance was dominated by the textile industry (+1,300), up seasonally in the knitting mill portion. Other seasonal gains were reported by the printing and publishing, (+400), rubber and plastics (+300), and miscellaneous manufacturing (+300) industries. Cutbacks in the apparel industry (-1,000) and a labor-management dispute in the leather industry (-700) tempered the soft goods employment gain.

Nonfarm employment in May 1984 was 181,400 higher than a year ago. All industry divisions, except transportation and public utilities, shared in the expansion. The services (+75,600) and trade (+53,000) groups reported the largest over-the-year job increases. ■

[1] Unemployed as percent of combined total of employed and unemployed.

Unemployment Insurance Tax Rates, 1983

Elias D. Loizides

HIGHLIGHTS

- Unemployment insurance tax rates for 1983 average 3.12 percent of taxable payrolls--a combination of 2.12 percent normal tax, and 1.0 percent subsidiary tax.

- In 1982, when the taxable wage base was $6,000,[1] the combined average tax rate was 3.13 percent, including an average normal tax of 2.13 percent, and a 1.0 percent subsidiary tax.

- Among the major industry groups, average tax rates were highest in the construction; agriculture, forestry, and fishing; and apparel industries; and they were lowest in finance, insurance, and real estate; and in the transportation and public utilities division. There was wide variation within divisions, however.

- Firms with taxable payrolls under $10,000 or over $25 million had the lowest U.I. tax rates, on the average, while rates averaged highest among employers in the $100,000 to $1,000,000 range of taxable payrolls.

PROVISIONS FOR RATE ASSIGNMENT

Under the current New York State system, covered employers pay unemployment insurance taxes on the first $7,000[1] of wages that they pay to each of their employees during the calendar year.[2] These taxes are pooled in an Unemployment Insurance Fund, from which benefits are paid to all eligible unemployed workers.

In most years an employer's tax rate is composed of two parts: (1) a normal rate, which may be based upon his experience with unemployment and (2) a subsidiary rate, which is the same for all employers.

To vary employers' normal tax rates according to the incidence of unemployment among their workers (often referred to as "experience rating"), a bookkeeping account is set up within the Unemployment Insurance Fund for each covered employer. His normal taxes are credited, and chargeable benefits paid to his former employees are debited to his individual account. On December 31, the computation date for experience rating, his account balance is computed as a percentage of his annual taxable wages, and this "account percentage" is the measure of experience on which his normal tax rate for the next year is based. An account percentage may be positive or negative depending upon whether the account showed a positive or negative balance at the end of the year.

Once an employer's account percentage has been computed, his normal tax rate is read from the tax table for experience rating shown in Table 1. The seven columns in the tax table show seven alternative rate schedules, only one of which is applicable in any year. The appropriate schedule depends on the level of reserves in the Unemployment Insurance Fund--the higher the reserves, the lower the scale of rates. The measure of reserve level used for selecting the proper rate column is the Size-of-Fund Index, which is computed by expressing total year-end reserves as a percentage of the combined taxable wages of all liable firms. On December 31, 1982, the Index stood at 2.24 percent[3]; therefore the first column of normal rates in the table applied for 1983 as it has since January 1, 1976. Rates in this column range from 0.5 percent to 4.2 percent.

Following the assignment of normal tax rates for the coming year (but as of the same computation date), the amount of any individual negative account balance that exceeds 2 percent of the employer's annual taxable wages is transferred as a charge to a General Account in the Unemployment Insurance Fund. Thus, no firm starts the next year with a deficit of more than 2 percent. However, if an employer has part of a negative balance transferred, the normal tax rates assigned to him on the next three December 31 rate-computation dates are restricted to not less than 2.7 percent.

To finance the transfer of negative-balances, the General Account is credited with the interest earned on reserves in the Fund, but the interest alone is not enough to fully offset the transfers. The law therefore provides that if the year-end balance in the General Account is less than $120 million, all employers liable for unemployment insurance taxes pay a subsidiary tax in the coming year in addition to their normal tax, and the proceeds from the subsidiary tax are credited to the General Account. (There are also other minor credits and charges.) The subsidiary rate varies from 0.1 percent to 1.0 percent, according to the size of the General Account balance, but it cannot increase more than 0.3 percent in any one year. On December 31, 1982 there was a deficit of $1,101 million in the General Account, requiring the subsidiary rate to remain at the maximum 1.0 percent for 1983.

---

[1] Effective January 1, 1983, the maximum taxable wage base was raised from $6,000 to $7,000.

[2] Covered local governments and nonprofit organizations may elect to reimburse the Unemployment Insurance Fund for benefits paid former employees, instead of paying taxes; the State of New York also reimburses the Fund for benefits.

[3] There was a net positive balance of $778 million in the Fund at the end of 1982.

Although most firms' normal tax rates are based on their individual experience, a few categories of employers are not qualified for experience rating and are assigned special rates fixed by law. Thus an employer who has not filed all prescribed reports by the computation date must pay a normal tax rate of 2.7 percent, unless a higher rate would otherwise apply to him. A firm that has not been in the system more than a year (provided it is not delinquent in filing reports) is assigned either the highest normal tax rate applicable to a qualified employer with a positive-account balance, or 2.7 percent, whichever is lower. The same provision applies to firms that paid no wages in the last payroll year. For 1983, the normal rate for these two groups of employers was 2.7 percent.

Finally, employers in the apparel industry may elect a fixed normal tax rate of 3.0 percent in place of the tax rates that would otherwise apply to them under the experience rating system and employers in the construction industry and those engaged in processing local fresh fruits and vegetables may elect a fixed normal tax rate of 3.2 percent. These elections, which may be renewed, are for three years.

RATE ASSIGNMENTS FOR 1983

Normal Tax Rates

On the December 31, 1982 computation date, more than 395,000 employers were assigned tax rates for 1983 (See Table 2). For more than 61,400 of these firms, the normal tax rate was fixed by statute at 2.7 percent, bringing their combined normal plus subsidiary tax rate to 3.7 percent. Each of these specially rated firms was in one of three categories of nonqualified employers described previously, or had had a portion of a negative balance transferred to the General Account within the last three years. Almost 32,000 of the nonqualified firms had been in the U.I. system less than a year. The firms whose normal tax rates were fixed by statute (excluding those that paid no wages in the past year) comprised almost 14 percent of all liable firms but had less than 2½ percent of the taxable payrolls, primarily because of their smaller than average size and also because the payrolls of newly liable employers covered less than a full year.[4]

There were almost 13,000 employers related to the apparel, construction, and food processing industries that had elected fixed normal rates of 3.0 percent and 3.2 percent. These employers had combined tax rates of 4.0 percent and 4.2 percent.

The remaining employers, more than 320,800, were assigned rates for 1983 from the tax table for experience rating. Almost 16 percent of these firms (more than 50,400) had negative balances and comprised almost 13 percent of all liable firms with about 14 percent of all taxable payrolls. Their combined tax rates ranged from 4.3 percent to 5.2 percent, and almost 21,800 firms were assigned the maximum tax rate. There were 66,600 negative balance firms that were active on December 31, 1982, a decline of less than 900 from a year earlier, but the number at the maximum tax rate increased by almost 600 firms.

Positive balance firms accounted for about 83 percent[5] of the active firms. Those positive balance firms that were rated on the basis of their account percentage represented about 68 percent of all active firms, and were the source of almost 78 percent of the taxable payrolls. Combined tax rates for these 270,400 employers ranged from 1.5 percent to 4.1 percent. More than 86,200 firms qualified for the minimum tax rate, or about 7,000 more firms than qualified in 1982.

Subsidiary Tax Rates

The subsidiary tax rate in 1983, which is uniform for all employers, was set at the maximum rate of 1.0 percent of taxable payrolls for the 10th consecutive year. After eight consecutive years of record setting year-end deficits in the General Account, the deficit decreased for two years--from $1,163 million in 1980 to $1,114 million in 1981 and then to $1,101 million in 1982. However, the 1982 General Account balance was still far below the $12 million surplus needed for the next lower tax rate to take effect.

---

[4] The size of a firm is defined by its annual taxable payrolls reported for the 12-month period ending September 30.

[5] See "New York State Unemployment Insurance Tax Rates, 1983", July 1984, Tables 1-4, and 15-21 for more detail.

Tax Rates by Industry and Size

Among the major industry divisions, average 1983 tax rates, for the combined normal and subsidiary tax, ranged from 2.47 percent in the finance-insurance-real estate group to 4.01 percent in construction. Within the major divisions, however, average rates for industry subgroups varied widely, as indicated in Table 3.

Average tax rates by size of firm are shown for 1983 in Table 4. Employers were classified by size on the basis of their taxable payrolls in the 1982 payroll year. Tax rates averaged lowest for firms with taxable payrolls less than $10,000 or over $25 million and highest for those with taxable payrolls ranging from $100,000 to $1,000,000.

Tax Rates on Total and Taxable Payrolls

The average combined tax rate on taxable payrolls for 1983 was 3.12 percent. In 1982, the average tax rate was 3.13 percent. However, the average effective tax rate as a percent of total payrolls rose to 1.13 percent in 1983 from 1.07 percent in 1982 because of the expected increase in contributions brought about by the increase in the maximum taxable wage base from $6,000 to $7,000 in 1983.[6]

EXPERIENCE IN 1982: PAYROLLS, CONTRIBUTIONS AND BENEFITS

This section pertains to the 1982 experience of those firms which were active at the end of 1982 and were assigned tax rates for 1983. Taxable payrolls in 1982 were determined by the $6,000 taxable wage base, however, tax rates for 1983 were applied to taxable payrolls on a taxable wage base of $7,000.

Taxable Payrolls in Relation to Total Payrolls by Industry and Size of Firm

Taxable and total payrolls for the payroll year ending September 30, 1982 are shown by major industry groups in Table 5 and by size of annual taxable payroll in Table 8. In both tables, the data are broken out by positive and negative balance firms. Percentages of payrolls that were taxable on the $6,000 tax base varied widely among industry groups and also among size groups.

One cause of this variation was the difference in average wage levels among employer groups. Firms with relatively high average wage levels tended to have lower percentages of payrolls that were taxable, on the uniform $6,000 wage base, than firms with lower wage levels.

A second factor, labor turnover, affected the percentage of payolls that were taxable. Wages up to $6,000 were taxable if a position in a firm was filled by the same individual all year. If it was filled by one person part of the year and by another the rest of the year, wages up to $6,000 were taxable for each of the two employees. Thus, the taxable proportion was likely to be greater in firms and industries where there was high turnover.

Table 5 indicates that among the industry divisions, the mining, transportation-public utilities group, and metals and machinery manufacturing had relatively low percentages of payrolls that were taxable in 1982, while the agriculture, forestry, and fishing, public administration, and apparel manufacturing groups had the highest percentages. There were wide variations of taxable percentages among small industry groups within major divisions. In most industry groups, the taxable proportion averaged higher for negative balance firms than for positive balance firms.

Table 8 illustrates a downward progression in the average percentage of wages taxable, as the size of the firm increases. In the 1982 payroll year, these averages ranged from 47 percent for firms with taxable payrolls below $10,000 to 26 percent for those in the $25 million-and-over bracket.

Contributions and Contribution Rates by Industry and Size of Firm in New York State, Calendar Year 1982

Tables 6 and 9 show normal contributions, by industry and by size of firm, credited in 1982 to employer accounts active at the end of the year. (Subsidiary taxes are excluded from these amounts because they are credited to the General Account, not to employer accounts.) The overall normal contribution rate, expressed as a percent of total payrolls, was 0.7 percent.[7]

- The average normal contribution rate was 0.6 percent of total payrolls for positive balance employers and 1.3 percent for negative balance employers.

- Among industry divisions, average normal contribution rates were highest for agriculture, forestry, and fishing (1.6 percent), public administration (1.3 percent), apparel (1.2 percent), and construction (1.1 percent). They were lowest for transportation and public utilities (0.4 percent), the finance and metals and machinery groups (0.5 percent), and the mining group (0.6 percent).

---

[6] Ibid., see Table E.

[7] Total payrolls paid to employees of firms with active accounts at the end of 1982, during the 12-month period ending September 30, 1982.

- For all industries combined, the largest and smallest firms had lower normal contribution rates, on the average, than firms of medium size.

Benefits and Benefit Cost Rates by Industry and Size of Firm in New York State, Calendar Year 1982

Tables 7 and 10 show benefit payments, by industry and size of firm, charged in 1982 to employers with active accounts at the end of the year. These charges amounted to an average benefit cost rate of 1.1 percent of total payrolls.

- Negative balance firms were charged with more than 64 percent of the $1,054 million of benefits, but these firms comprised only 17 percent of the total number of active employers at the end of the year and had only 19 percent of the 1982 taxable payrolls.
- Positive balance firms had, on the average, a benefit cost rate of 0.5 percent of total payrolls, compared with 4.3 percent for negative balance firms.
- Among industry groups, the highest average benefit cost rate was in apparel (4.3 percent), followed by agriculture, forestry, and fishing (3.7 percent), and construction (2.9 percent), while the finance, insurance, and real estate industry had the lowest benefit cost rate (0.3 percent), followed by transportation and public utilities (0.5 percent). Within industry divisions, benefit cost rates varied widely among subgroups.
- For all industries combined, larger firms tended to have lower benefit cost rates, on the average, than smaller firms. ■

---

[1] On January 1, 1983, the taxable wage base was raised from $6,000 to $7,000.

[2] An employer's account percentage is the December 31 balance in his account in the Unemployment Insurance Fund, as a percentage of his taxable wages in the last payroll year (ending September 30).

[3] The Size-of-Fund Index is the moneys in the Fund on December 31, as a percentage of all taxable wages in the last payroll year, or as a percentage of the annual average of the taxable wages of the last 3 payroll years, whichever percentage is less.

[4] The U.I. Law specifies that an employer must pay at least 0.3 percent combined normal and subsidiary tax. If in any year, 0.3 percent exceeds the sum of the subsidiary tax rate and his rate from this table, the additional amount paid is credited to his account.

---

[1] Average rate per dollar of taxable payrolls on $7,000 base; includes subsidiary tax of 1.0 percent.

[2] Accounts of firms that are liable for unemployment insurance tax contributions.

[3] Taxable payrolls for the 12-month period ending September 30, 1982.

[4] Before transfer to the General Account of portions of individual negative account balances that exceeded 2 percent of the employer's taxable payroll.

[5] Excludes firms whose rates under experience rating (including 1.0 percent subsidiary tax) are 3.8 or more.

[6] Firms that had parts of negative balances transferred to the General Account within the last 3 payroll years.

[7] Rates assigned to those firms in the apparel, canning and freezing, and construction industries that have elected special rates for a 3-year period as provided by Article 18 of the New York State Unemployment Insurance Labor Law.

[8] Includes firms that failed to file reports by December 31, 1982, or that had negative balance transfers in the last 3 payroll years.

NOTE: Details may not add to totals because of rounding.

Table 3. AVERAGE UNEMPLOYMENT INSURANCE TAX RATES BY DETAILED INDUSTRY CLASSIFICATION, NEW YORK STATE, 1983

Industry division and group [1]	Number of employer accounts 1983 [2]	Average tax rates [3]
All industries [4]	395,263	3.12
Manufacturing	30,135	3.34
Durable goods	10,125	3.31
Metals and machinery	7,635	3.26
Primary metal industries	383	4.13
Fabricated metal products	2,201	3.60
Machinery, except electrical	2,566	3.16
Electrical and electronic equipment	1,352	3.37
Transportation equipment	369	3.98
Instruments and related products	764	2.46
Other durable goods	2,490	3.75
Lumber and wood products	980	3.65
Furniture and fixtures	766	3.79
Stone, clay and glass products	744	3.75
Nondurable goods	20,010	3.38
Apparel and other textile products	6,765	3.82
Other nondurable goods	13,245	3.25
Food and kindred products	1,285	3.20
Tobacco manufactures	13	2.41

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for April 1984 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
351	Engines and turbines	$415.08	37.7	$11.01
382	Measuring & controlling instruments	332.27	41.9	7.93
239	Miscellaneous fabricated textile products	212.18	36.9	5.75

[3] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

Table A-4. AVERAGE WEEKLY HOURS AND AVERAGE OVERTIME HOURS OF PRODUCTION WORKERS IN SELECTED MANUFACTURING INDUSTRIES, NEW YORK STATE

(See page i for explanation of data)

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory workers in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for April 1984 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
33	Primary metal industries	$328.99	37.3	$8.82
205	Bakery products	380.56	37.2	10.23
264	Converted paper products, exc. boxes	298.29	39.3	7.59

[3] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 60,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1983 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--Hours, Average Weekly Overtime. Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.

[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual - List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or –	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.
2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.
3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Compiled on a fiscal year basis for the state, selected major labor areas, New York City, and the Suburban District (Westchester, Rockland, and Putnam counties).
4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1983.
5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**
6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.
7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

OTHER RECURRENT REPORTS -- Continued

8. **Collective Bargaining Settlements, New York State, Annual.** The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

13. **Occupational Brief.** To date, occupational briefs have been prepared for: *Air-Conditioning, Refrigeration,* and *Heating Mechanic, Air-Traffic Controller, Bank Teller, Computer Programmer, Dental Hygienist, Flight Attendant, Insulation Worker, Machinist, Medical Office Assistant, Occupational Therapist, Physical Therapist,* and *Police Officer.* The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. September 1983.

14. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative action plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

15. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

16. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State.* The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00.

17. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females; blacks; American Indians, Eskimos, and Aleuts; Asians and Pacific Islanders; and persons of Hispanic origin. Percent distributions are also shown. March 1983.

SPECIAL REPORTS -- Continued

18. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

B-PUBLICATIONS

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

235. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983.** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1981.** This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $7.00.

LABOR RESEARCH REPORTS

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** This report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Administration.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

83-4. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1981.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1980-1981.

VOL. 37 NO. 6

STATE OF NEW YORK
Mario M. Cuomo, Governor

DEPARTMENT OF LABOR
Lillian Roberts, Commissioner

NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS - Angelo J. Massa, Acting Director

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
June 1984

Civilian Labor Force

Resident employment in New York State increased slightly between May and June 1984, rising 6,000 to 7,487,000. This was the fourth consecutive month that a record-high for the month was established. The number of employed persons residing in New York State was 39,000 higher than a year ago.

The number of jobseekers across the state in June 1984 was up from a month ago as expected, increasing 74,000 to 583,000. Since June 1983, unemployment in the state has fallen 166,000.

The sharp increase in unemployment caused New York's jobless rate to climb 0.8 of a percentage point from May to 7.2 percent in June 1984. The rise in the rate reflected the seasonal influx of graduates and students into the labor force. Over the past 12 months, the unemployment rate has declined 1.9 percentage points.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) surpassed 7.5 million for the first time, expanding 68,400 from May 1984 to 7,545,200 in June 1984. The June 1984 upturn was greater than average and reflected hiring in every industry division.

Jobs in the nonmanufacturing sector grew 51,000 from May 1984 to 6,216,800, a record breaking level. All nonfactory industry divisions reported higher job levels than a month ago with trade (+19,600) accounting for over one-third of the upswing. Seasonal hires in the restaurant and fast-food industry and the retail food stores industry comprised over 50 percent of the rise in trade employment. Construction payrolls swelled 11,100 over the month, the result of seasonal growth in all segments of the industry. The public sector, which normally shows little change in employment at this time of year, added 7,500 jobs to its May total, reflecting staffing of special education programs in the New York City school system. Smaller job advances occurred in the finance, insurance, and real estate (+5,400), services (+5,300), transportation and public utilities (+2,200), and mining (+100) groups. All component industries of the finance, insurance, and real estate division shared in the job pickup, with the largest gain occurring in the real estate industry. The majority of services industries experienced higher job levels in June, however, these gains were heavily tempered by summer furloughs of nonteaching personnel at private colleges and universities. Nearly all segments of the transportation and public utilities division expanded their pay rosters in June; only the communications industry suffered job losses.

Nearly all factory industries increased their job rosters in June, with the over-the-month expansion (+17,300) divided nearly equally between nondurable goods (+8,800) and durable goods (+8,500) hires. However, the soft goods upturn was strongly augmented by the return of strikers to their jobs in the apparel, leather, and miscellaneous manufacturing industries. The termination of a large labor-management dispute in the fur goods industry accounted for over half of the May-June gain in apparel jobs (+2,700). Other notable job increases occurred in the food (+1,100), chemical (+1,100), and miscellaneous manufacturing (+1,000) industries. The canning industry posted the largest gain in food jobs, while hires in the drug industry were responsible for over half of the expansion in chemical payrolls. Miscellaneous manufacturing employment was up primarily because of job additions in the toy-making industry.

Job additions in the nonelectrical machinery (+2,200), fabricated metals (+1,800), electrical machinery (+1,600), and instruments, photo and optical goods (+1,600) industries highlighted the June upturn in durable goods employment. Increased demand for office computers was responsbile for most of the rise in nonelectrical machinery jobs, while factory output was up in all segments of the fabricated metals industry. Expected gains in the communications equipment and electronic component industries were the main reason for the rise in electrical machinery jobs. Most of the job growth in the instruments industry occurred in the photographic equipment industry.

June 1984 marked the 10th consecutive month that the state's nonfarm job total exceeded that of a year ago. The current nonagricultural employment estimate was 176,200 above the level recorded 12 months ago. All industry divisions, except the transportation and public utilities group, shared in the over-the-year rise in nonfarm jobs. ■

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for May 1984 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
353	Construction mach., elevators, etc.	$346.98	40.3	$8.61
28	Chemicals and allied products	432.97	42.2	10.26
283	Drugs	430.53	43.4	9.92

[3] Change in sample composition. Earnings deleted until January 1985.

[4] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 60,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually. Current estimates are based on the March 1983 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--**Albany-Schenectady-Troy Area.* Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--**Binghamton Area.* Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--**Buffalo Area.* Erie and Niagara counties.
--**Elmira Area.* Chemung County.
--**Glens Falls Area.* Warren and Washington counties.
-- *Monroe Area.* Monroe County.
--**Nassau-Suffolk Area.* Nassau and Suffolk counties.
--**Newburgh-Middletown Area.* Orange County.
-- *New York City.* Bronx, Kings, New York, Queens and Richmond counties. [1]
-- *New York City Area.* Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- *New York Combined Area.* Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--**Poughkeepsie Area.* Dutchess County.
--**Rochester Area.* Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- *Rockland Area.* Rockland County.
--**Syracuse Area.* Madison, Onondaga and Oswego counties.
--**Utica-Rome Area.* Herkimer and Oneida counties.
-- *Westchester Area.* Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.

[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual -List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or –	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.

3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Compiled on a fiscal year basis for the state, selected major labor areas, New York City, and the Suburban District (Westchester, Rockland, and Putnam counties).

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1983.

5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**

6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.

7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

8. **Collective Bargaining Settlements, New York State.** Annual. The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

13. **Occupational Brief.** To date, occupational briefs have been prepared for: *Air-Conditioning, Refrigeration,* and *Heating Mechanic, Air-Traffic Controller, Bank Teller, Computer Programmer, Dental Hygienist, Flight Attendant, Insulation Worker, Machinist, Medical Office Assistant, Occupational Therapist, Physical Therapist,* and *Police Officer*. The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. September 1983.

14. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative action plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

SPECIAL REPORTS -- Continued

15. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

16. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State*. The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00.

17. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females; blacks; American Indians, Eskimos, and Aleuts; Asians and Pacific Islanders; and persons of Hispanic origin. Percent distributions are also shown. March 1983.

18. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

B-PUBLICATIONS

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

235. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1983.** This edition lists names and addresses of principal or executive officers of over 5,200 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $8.00.

LABOR RESEARCH REPORTS

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** This report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Administration.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

84-2. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1982.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1982.

EMPLOYMENT REVIEW

JULY 1984
VOL. 37 NO. 7

STATE OF NEW YORK
Mario M. Cuomo, Governor

DEPARTMENT OF LABOR
Lillian Roberts, Commissioner

NEW YORK STATE DEPARTMENT OF LABOR
DIVISION OF RESEARCH AND STATISTICS

This monthly bulletin presents basic labor area information for New York State as a whole and for selected labor market areas. Statistics for New York are developed in cooperation with the Employment and Training Administration and the Bureau of Labor Statistics of the United States Department of Labor. Parallel information for the country as a whole and for other states may be found in *Employment and Earnings* and *Monthly Labor Review* published by the United States Department of Labor.

MONTH IN REVIEW
July 1984

Civilian Labor Force

The number of employed New Yorkers rose 174,000 from June 1984 to 7,661,000 in July 1984. The current resident employment level was just 6,000 under the record-setting level for the month of July established one year earlier.

Total unemployment in the state was up sharply between June and July 1984, increasing 97,000 to 680,000. However, compared with a year ago, there were 51,000 fewer jobseekers in July 1984.

The rise in unemployment pushed New York's unemployment rate up a full percentage point from June to 8.2 percent in July 1984, or 0.5 of a percentage point less than in July 1983.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) declined 44,000 from the all-time high set in June 1984 to 7,501,200 in July 1984 with approximately six out of 10 job losses in the nonmanufacturing sector. Despite the over-the-month downturn, nonfarm employment was at a record-high level for the month of July.

The nonmanufacturing job count fell 25,800 over the month under the weight of seasonal cutbacks in government (-15,400), trade (-13,900), and transportation and public utilities (-8,900). End-of-school year cutbacks of nonsalaried personnel in state and local education, particularly local schools, resulted in a decline in public sector jobs. However, hiring by local governments for youth for the summer with monies provided by the Job Training Partnership Act greatly softened the effect of the school furloughs. All categories of trade reported lower job levels in July, with over 40 percent of the expected downturn in the restaurant and fast-food industry. Nevertheless, employment in trade was at the highest recorded level for the month of July. The bulk of the decline in the transportation and public utilities division was in school bus transportation, reflecting the end of the school year. Over-the-month job gains in services (+5,100) and finance, insurance, and real estate (+3,900), which reached all-time high levels, and a seasonal increase in construction (+3,300) tempered these losses. The largest increases in services employment occurred in the highly seasonal hotel, motel and trailer park industry and the amusement and recreational services industry. Summer vacation furloughs of nonteaching personnel in private education slowed the rise in services jobs. Nearly all industry components shared in the increase in finance, insurance, and real estate employment; only the credit agency industry reported fewer jobs than a month ago. The special trade contractors industry accounted for nearly half of the gain in construction jobs.

Sustained demand for factory products kept the seasonal downturn in manufacturing employment to a minimum in July 1984--one of the smallest June-July declines in 20 years. The factory job level declined 18,200 over the month, primarily the result of employees on unpaid vacation leave. Employment losses in the nondurable goods segment accounted for 12,800 or 70 percent of the manufacturing job decrease. The largest soft goods job losses occurred in the apparel (-6,300), miscellaneous manufacturing (-2,100), leather (-1,900), and paper (-1,700) industries. The food industry (+1,200) was the only soft goods industry with higher employment, because of hiring in the canning component.

The number of durable goods jobs dropped 5,400 in July with the most notable employment reductions in the fabricated metals (-1,200), stone, clay, glass and concrete (-1,100), and electrical machinery (-1,100) industries. A labor-management dispute in the concrete products industry accounted for much of the decrease in stone, clay, glass and concrete employment.

July 1984 marked the 11th consecutive month that New York State's nonfarm job total exceeded that of a year ago. The current nonfarm employment estimate was 196,900 above the level recorded 12 months earlier. All industry divisions shared in the over-the-year upswing with the largest gains registered by services (+66,500) and trade (+48,900). ■

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for June 1984 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
349	Misc. fabricated metal products	$347.23	42.5	$8.17
353	Construction mach., elevators, etc.	332.11	37.4	8.88
384	Medical & dental instruments and supplies	302.57	39.5	7.66
282	Plastics materials, synthetic resins, etc.	482.31	44.7	10.79
394	Toys, amusement, sporting and athletic goods	275.71	38.4	7.18

[3] Change in sample composition. Earnings deleted until January 1985.

[4] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

Table A-4. AVERAGE WEEKLY HOURS AND AVERAGE OVERTIME HOURS OF PRODUCTION WORKERS IN SELECTED MANUFACTURING INDUSTRIES, NEW YORK STATE

(See page i for explanation of data)

SIC Code	Industry	Average weekly hours		Average weekly overtime hours		Overtime hours as percent of total hours

---

[1] Earnings and hours data refer to production and related workers in manufacturing, to on-site workers and shop and yard employees engaged in construction, and to nonsupervisory workers in all other industries. Earnings and hours data for wholesale and retail trade and retail trade exclude eating and drinking places.

[2] Data for June 1984 are revised as follows:

SIC Code	*Industry*	*Average weekly earnings*	*Average weekly hours*	*Average hourly earnings*
25	Furniture and fixtures	$279.00	37.4	$7.46
254	Partitions and fixtures	313.94	41.2	7.62
33	Primary metal industries	325.78	38.6	8.44
35	Machinery, except electrical	335.70	40.3	8.33
355	Special industry machinery	360.10	40.1	8.98
234	Women's, children's, infants' undergarments	213.91	33.9	6.31
39	Misc. manufacturing industries	257.89	37.0	6.97

[3] Change in sample composition. Earnings deleted until January 1985.

[4] Represents the number of checks issued regardless of funding source to individuals in: state departments and agencies; Legislature; Judiciary; public authorities; and miscellaneous boards and commissions as of the pay period including the 12th of the particular report month(s).

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 60,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are normally subject to revision annually Current estimates are based on the March 1983 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Earnings, Average. For manufacturing, the averages cover production and related workers only. For the remaining industries, averages cover all nonsupervisory employees and working supervisors unless otherwise specified.

--Earnings, Average Hourly. Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, and sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--Earnings, Average Weekly. Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

Employment, Nonfarm. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight on individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Hours, Average Weekly. See *Earnings, Average* for description of workers covered. The averages represent total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Hours, Average Weekly Overtime.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Production Workers. Includes working foremen and all nonsupervisory workers (including leadmen and trainees) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and watchman services, product development, auxiliary production for plant's own use (e.g., power plant), and in record-keeping and other services closely associated with the above production operations. Excludes supervisory employees (above the working foremen level) and their clerical staffs, routemen, salesmen and force-account construction workers.

Reference Week of the Month. Employment, payroll, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

MAJOR LABOR AREA

A major labor area is a defined geographical section of New York State in which there is a major concentration of employment and economic activity. For purposes of labor statistics, a labor area includes a whole county or counties even though the economic activity may be centered in a segment of the whole. The composition of the major labor areas (which differ from the administrative jurisdictions of the unemployment insurance and job service program) is given below.

--*_Albany-Schenectady-Troy Area._ Albany, Montgomery, Rensselaer, Saratoga and Schenectady counties.
--*_Binghamton Area._ Broome and Tioga counties, New York; Susquehanna County, Pennsylvania.
--*_Buffalo Area._ Erie and Niagara counties.
--*_Elmira Area._ Chemung County.
--*_Glens Falls Area._ Warren and Washington counties.
-- _Monroe Area._ Monroe County.
--*_Nassau-Suffolk Area._ Nassau and Suffolk counties.
--*_Newburgh-Middletown Area._ Orange County.
-- _New York City._ Bronx, Kings, New York, Queens and Richmond counties. [1]
-- _New York City Area._ Bronx, Kings, New York, Queens, Richmond, Putnam, Rockland and Westchester counties.
-- _New York Combined Area._ Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties. [2]
--*_Poughkeepsie Area._ Dutchess County.
--*_Rochester Area._ Livingston, Monroe, Ontario, Orleans and Wayne counties.
-- _Rockland Area._ Rockland County.
--*_Syracuse Area._ Madison, Onondaga and Oswego counties.
--*_Utica-Rome Area._ Herkimer and Oneida counties.
-- _Westchester Area._ Westchester County.

* Geographical boundaries of labor area are identical with boundaries of the Standard Metropolitan Statistical Area (SMSA) established by the U.S. Office of Management and Budget.

[1] Subarea of New York City area.

[2] Combination of New York City area and Nassau-Suffolk area.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1972 edition of the *Standard Industrial Classification (SIC) Manual)* prepared by the U.S. Office of Management and Budget. Coverage of the classification *Services and miscellaneous* varies geographically. For New York State and New York City, this classification includes: the services industry division; forestry, fisheries and selected services relating to agriculture; and nonclassifiable establishments. For other areas this classification also includes the mining industry division. For space requirements on the statistical tables, the formal SIC title for some of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1972 edition of the *SIC Manual -List of short SIC Titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to totals because of rounding.

Revisions. Revised figures are preceeded by an "r" when first published.

KEY

Blank or -	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment Trends.** Monthly for New York State. Highlights current developments in employment and unemployment.

2. **Labor Area Summary.** Monthly for the 11 major labor areas of the state. Includes analysis of employment and unemployment developments. Obtainable from district offices of the Bureau of Labor Market Information.

3. **Annual Planning Information.** Economic developments and outlook, population and labor force characteristics and trends, employment developments and outlook by industry and occupation, trends in employment and unemployment. Compiled on a fiscal year basis for the state, selected major labor areas, New York City, and the Suburban District (Westchester, Rockland, and Putnam counties).

4. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates. Available for years 1964-1983.

5. **Evaluation of the New York State Unemployment Insurance Fund.** Annual. Provides an appraisal of the status of the New York State Unemployment Insurance Fund in relation to potential liabilities. Available for years 1964-1971. For later years, see 1982-3 under **Labor Research Reports.**

6. **Occupational Employment Statistics.** Series of individual triennial reports analyzing and detailing occupational patterns by industry sector: manufacturing, selected nonmanufacturing, wholesale and retail trade, regulated industries, and federal, state, and local government.

7. **Collective Bargaining Settlements in New York State.** Monthly. Summarizes each settlement (changes in wages and fringe benefits) affecting 50 or more workers.

8. **Collective Bargaining Settlements, New York State.** Annual. The 1980 issue summarizes changes in 731 settlements reached in 1980, covering about 754,000 workers in 19 manufacturing and 7 nonmanufacturing industries.

9. **Statistics on Work Stoppages, New York State.** Annual. Data on the number of strikes, the number of workers, involved and man-days idle; describes major work stoppages. 1978-1979 report available.

10. **Work Stoppages in New York State.** Monthly. Listing gives parties, number of workers directly affected, locations and dates.

11. **Consumer Price Index, Selected Areas and Population Groups.** This bimonthly report presents tabular material on the Consumer Price Index for the United States, New York City SMSA, Buffalo SMSA, and by selected urban population size class. Data are presented for all urban consumers, and wage earners and clerical workers.

SPECIAL REPORTS

Special Reports 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

12. **Employment Problems of Older Workers in New York State, 1979.** This report, the first of three annual reports dealing with employment opportunities of older workers, was prepared in response to a mandate in a 1978 amendment to the New York State Labor Law. Topics discussed include the characteristics of older workers in the United States and New York State, and the access to employment opportunities for older workers. The report also makes recommendations for changes to provide increased job opportunities for older workers in New York State. April 1980.

13. **Occupational Brief.** To date, occupational briefs have been prepared for: *Air-Conditioning, Refrigeration,* and *Heating Mechanic, Air-Traffic Controller, Bank Teller, Computer Programmer, Dental Hygienist, Flight Attendant, Insulation Worker, Machinist, Medical Office Assistant, Occupational Therapist, Physical Therapist,* and *Police Officer*. The booklets, intended primarily for use by youth and counselors, include typical job duties performed, earnings expected, typical hours and days worked, working conditions, educational requirements, job locations, opportunities for advancement, employment outlook, and other related information. September 1983.

14. **Affirmative Action Data, Total, Female and Minority Population: 1980.** This booklet provides data from the 1980 Census for New York State, standard metropolitan statistical areas (SMSA's), counties, and subdivisions with population of 25,000 or more, for use in preparing or assessing affirmative action plans. Tables show total population, and populations of females and minorities, with distributions by race and Hispanic origin. March 1982.

SPECIAL REPORTS -- Continued

15. **High-Technology Industries in New York State.** Acting on a commission from the NYS Science and Technology Foundation, the Battelle Corporation identified 52 high-technology industries which are both desirable and feasible for New York State. The industries in which New York has the best competitive position are the subject of this report. The report includes information on employment and wages in these 52 industries, detailed by four-digit-SIC industry code and by area. Where possible, comparisons have been made with high-technology industries nationwide. April 1983. Price $5.00.

16. **Occupations in High-Technology Industries in New York State.** This report contains information on the occupations found in 52 high-technology industries selected for their potential for long-term growth in the state; it complements *High-Technology Industries in New York State*. The report includes sections covering occupational staffing patterns, significant occupations, apprenticeship occupations, assemblers, educational requirements, occupational supply and demand, and occupational outlook. July 1983. Price $5.00.

17. **Total and Civilian Labor Force Summary, Selected Demographic Groups, New York State, Counties, and SMSA's, 1980.** This booklet contains labor force data from the 1980 Census for New York State, its standard metropolitan statistical areas, counties, and New York City, for use in developing and assessing affirmative action plans. Tables include: total and civilian labor force; employment, unemployment, and the unemployment rate for all persons 16 years of age and older and for females; blacks; American Indians, Eskimos, and Aleuts; Asians and Pacific Islanders; and persons of Hispanic origin. Percent distributions are also shown. March 1983.

18. **Civilian Labor Force by Occupation, Selected Demographic Groups, 1980.** These tables, which contain data from the 1980 Census, can be used in developing and assessing affirmative action plans. They show civilian labor force data by occupation for persons aged 16 and over. Data are also included for females, minorities, Hispanics, blacks, and other races. Tables are available for New York State, Standard Metropolitan Statistical Areas, and counties. February 1984.

B-PUBLICATIONS

210. **Occupational Injuries and Illnesses in New York State, 1974.** This publication includes the results of a survey in 1974 of occupational injuries and illnesses in New York State. Nonfarm employers in most industries were covered; self-employed individuals, farm, mining, and railroad employers, and government units were excluded. The findings include data on work injuries and occupational illnesses, classified according to whether they were fatal cases, lost-workday cases, or non-fatal cases without lost workdays.

213. **Separation Pay in Union-Management Agreements, 1975.** Examines the prevalence, utilization, and types of separation-pay clauses found in nearly 50 percent of the 1,156 collective bargaining contracts surveyed in New York State.

218. **Wages and Other Conditions of Employment in Residential Buildings, New York State, 1975.** Using data from employer payroll records, this report includes information on salaries, payments-in-kind, working conditions of janitors, and other building service employees, by type of building and geographic area.

222. **Provisions of Union Agreements in Hospitals and Homes in New York State, 1975.** This report summarizes wages and fringe benefit policies of institutions in the health-care field in 1975.

228. **Union Contracts in New York State, Coverage and Characteristics, 1979.** Analyzes the coverage and characteristics of union agreements on file in the New York State Labor Department, effective at some time during 1979. It excludes agreements negotiated for employees in government, hospitals, and railroads. The analysis is based on 1,330 contracts negotiated for approximately 1,353,000 workers, out of an estimated 1,900,000 union members in the state (in 1976) who worked in industries covered by this report.

231. **The Garment Industry in New York State.** A report on the economic conditions of the garment industry in New York State. The first section reviews problems encountered in the early years of the industry. The second section reviews trends in apparel manufacturing in the state, touching on subjects such as type of operation, diversity of products, wage rates, loss of apparel manufacturing establishments and employment to other states, competition from imports. The data presented cover 1980 or the latest year for which information exists.

235. **A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1983** A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1983.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Public and Employee Communication, New York State Department of Labor, State Campus, Albany, New York 12240.

243. **Characteristics and Costs of Work Injuries in New York State, 1966-1970.** Highlights the sources of accidents that account for most workmen's compensation indemnity and medical payments. (10 volumes) Price $10.00.

245. **Private Pension Plans in New York State, 1971.** Study includes summaries of 279 large private pension plans. Price $3.00.

246. **Directory of Employee Organizations in New York State, 1983.** This edition lists names and addresses of principal or executive officers of over 5,200 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $8.00.

LABOR RESEARCH REPORTS

79-2. **Pensioners Who Received Unemployment Insurance Benefits, New York State, November 1978.** This study provides information on the labor force and unemployment benefit experience of pensioners in New York State who claim unemployment benefits and on the potential effect of a Federal Unemployment Compensation Amendment effective in April 1980, which will reduce their unemployment benefits by the amount of pension received.

79-3. **The 1978 New York City Newspaper Strike and Its Effect on Employment and Unemployment Insurance.** This report gives the story of the 1978 strike at the three major New York City newspapers, the issues involved, the economic impact, and terms of the settlements with the 11 unions involved.

81-1. **Prevailing Wage Information for Unemployment Insurance Administration.** Data based on prevailing wage surveys are used to determine whether claimants of unemployment insurance qualify for benefits if they refuse jobs because of allegedly low wages. This report describes the history of the prevailing wage program, survey methods, and other sources of wage data used in the program.

82-3. **Statistics Relative to the New York State Unemployment Insurance Fund, 1936-1980.** This publication brings together updated historical statistics pertaining to the New York State Unemployment Insurance Fund. Data in each table extend as far back over the history of the UI program as they are available. The narrative is not as detailed as the former annual report listed under **Other Recurrent Reports.**

84-2. **Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1982.** Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1982.
